1. Precautions

1-1. Safety Precautions

Follow these safety, servicing and ESD precautions to prevent damage and to protect against potential hazards such as electrical shock.

1-1-1. Warnings

1. For continued safety, do not attempt to modify the circuit board.
2. Disconnect the AC power and DC power jack before servicing.

1-1-2. Servicing the LED TV

1. When servicing the LED TV, Disconnect the AC line cord from the AC outlet.
2. It is essential that service technicians have an accurate voltage meter available at all times.
Check the calibration of this meter periodically.

1-1-3. Fire and Shock Hazard

Before returning the LED TV to the user, perform the following safety checks:

1. Inspect each lead dress to make certain that the leads are not pinched or that hardware is not lodged between the chassis and other metal parts in the LED TV.
2. Inspect all protective devices such as nonmetallic control knobs, insulating materials, cabinet backs, adjustment and compartment covers or shields, isolation resistorcapacitor networks, mechanical insulators, etc.
3. Leakage Current Hot Check (Figure 1-1):

WARNING : Do not use an isolation transformer during this test.

Use a leakage current tester or a metering system that complies with American National Standards Institute (ANSI C101.1, Leakage Current for Appliances), and Underwriters Laboratories (UL Publication UL1410, 59.7).

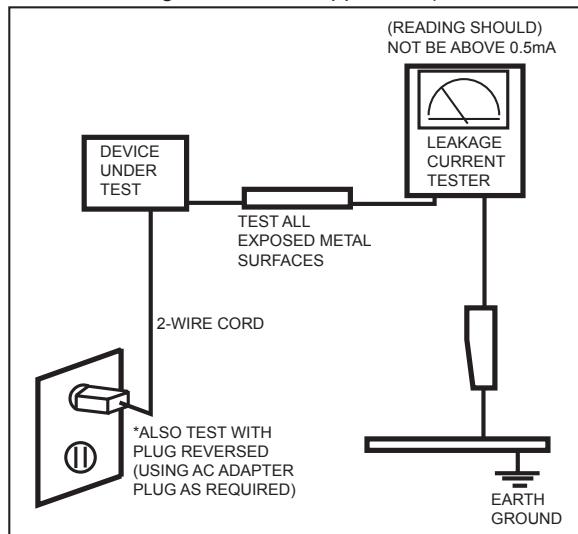

Figure 1-1. Leakage Current Test Circuit

4. With the unit completely reassembled, plug the AC line cord directly into a 120V AC outlet. With the unit's AC switch first in the ON position and then OFF, measure the current between a known earth ground (metal water pipe, conduit, etc.) and all exposed metal parts, including: metal cabinets, screwheads and control shafts.
The current measured should not exceed 0.5 milliamp.
Reverse the power-plug prongs in the AC outlet and repeat the test.

1-1-4. Product Safety Notices

Some electrical and mechanical parts have special safetyrelated characteristics which are often not evident from visual inspection. The protection they give may not be obtained by replacing them with components rated for higher voltage, wattage, etc. Parts that have special safety characteristics are identified by on schematics and parts lists. A substitute replacement that does not have the same safety characteristics as the recommended replacement part might create shock, fire and/or other hazards. Product safety is under review continuously and new instructions are issued whenever appropriate.

1-2. Servicing Precautions

- WARNING:** An electrolytic capacitor installed with the wrong polarity might explode.
- Caution:** Before servicing units covered by this service manual, read and follow the Safety Precautions section of this manual.
- Note:** If unforeseen circumstances create conflict between the following servicing precautions and any of the safety precautions, always follow the safety precautions.

1-2-1 General Servicing Precautions

1. Always unplug the unit's AC power cord from the AC power source and disconnect the DC Power Jack before attempting to:
 - (a) remove or reinstall any component or assembly,
 - (b) disconnect PCB plugs or connectors,
 - (c) connect a test component in parallel with an electrolytic capacitor.
2. Some components are raised above the printed circuit board for safety. An insulation tube or tape is sometimes used. The internal wiring is sometimes clamped to prevent contact with thermally hot components. Reinstall all such elements to their original position.
3. After servicing, always check that the screws, components and wiring have been correctly reinstalled. Make sure that the area around the serviced part has not been damaged.
4. Check the insulation between the blades of the AC plug and accessible conductive parts (examples: metal panels, input terminals and earphone jacks).
5. Insulation Checking Procedure: Disconnect the power cord from the AC source and turn the power switch ON. Connect an insulation resistance meter (500 V) to the blades of the AC plug. The insulation resistance between each blade of the AC plug and accessible conductive parts (see above) should be greater than 1 megohm.
6. Always connect a test instrument's ground lead to the instrument chassis ground before connecting the positive lead; always remove the instrument's ground lead last.

1-3. Electrostatically Sensitive Devices (ESD) Precautions

Some semiconductor (solid state) devices can be easily damaged by static electricity. Such components are commonly called Electrostatically Sensitive Devices (ESD). Examples of typical ESD are integrated circuits and some field-effect transistors. The following techniques will reduce the incidence of component damage caused by static electricity.

1. Immediately before handling any semiconductor components or assemblies, drain the electrostatic charge from your body by touching a known earth ground. Alternatively, wear a discharging wrist-strap device. To avoid a shock hazard, be sure to remove the wrist strap before applying power to the LED TV.
2. After removing an ESD-equipped assembly, place it on a conductive surface such as aluminum foil to prevent accumulation of an electrostatic charge.
3. Do not use freon-propelled chemicals. These can generate electrical charges sufficient to damage ESDs.
4. Use only a grounded-tip soldering iron to solder or desolder ESDs.
5. Use only an anti-static solder removal device. Some solder removal devices not classified as "anti-static" can generate electrical charges sufficient to damage ESDs.
6. Do not remove a replacement ESD from its protective package until you are ready to install it. Most replacement ESDs are packaged with leads that are electrically shorted together by conductive foam, aluminum foil or other conductive materials.
7. Immediately before removing the protective material from the leads of a replacement ESD, touch the protective material to the chassis or circuit assembly into which the device will be installed.
Caution: Be sure no power is applied to the chassis or circuit and observe all other safety precautions.
8. Minimize body motions when handling unpackaged replacement ESDs. Motions such as brushing clothes together, or lifting your foot from a carpeted floor can generate enough static electricity to damage an ESD.

1-4. Installation Precautions

1. For safety reasons, more than a people are required for carrying the product.
2. Keep the power cord away from any heat emitting devices, as a melted covering may cause fire or electric shock.
3. Do not place the product in areas with poor ventilation such as a bookshelf or closet. The increased internal temperature may cause fire.
4. Bend the external antenna cable when connecting it to the product. This is a measure to protect it from being exposed to moisture. Otherwise, it may cause a fire or electric shock.
5. Make sure to turn the power off and unplug the power cord from the outlet before repositioning the product. Also check the antenna cable or the external connectors if they are fully unplugged. Damage to the cord may cause fire or electric shock.
6. Keep the antenna far away from any high-voltage cables and install it firmly. Contact with the highvoltage cable or the antenna falling over may cause fire or electric shock.
7. When installing the product, leave enough space (0.4m) between the product and the wall for ventilation purposes. A rise in temperature within the product may cause fire.

2. Product specifications

2-1. Feature & Specifications

Model	UN32C5000QM			
Feature				
<ul style="list-style-type: none"> ▶ Digital-TV, RF, 4-HDMI, 1-Component, 2-A/V, 2-USB, D-SUB ▶ Brightness : 450 cd/m² ▶ Hgh Contrast Ratio : 50,000:1 ▶ Response Time : 4.5ms 				
Specifications				
Item	Description			
LCD Panel	32inch HD 60Hz			
Scanning Frequency	Horizontal : 60 kHz ~ 73 kHz (Automatic) Vertical : 47 Hz ~ 63 Hz (Automatic)			
Display Colors	1.07G color			
Maximum resolution	Horizontal : 1920 Pixels Vertical : 1080 pixels			
Input Signal	Analog 0.7 Vp-p ± 5% positive at 75Ω , internally terminated			
Input Sync Signal	H/V Separate, TTL, P. or N.			
Maximum Pixel Clock rate	74.25MHz			
Active Display Horizontal/Vertical	27.50 x 15.47 inches (698.4(H) x 392.85(V) mm)			
AC power voltage & Frequency	AC 110V ~ 120V, 60 Hz			
Power Consumption	Under 110W(Under 0.3W, Stand by)			
Dimensions Set (W x D x H)	30.9 x 9.4 x 21.6 inches (785 x 240 x 550 mm)_with stand 30.9 x 1.2 x 19.3 inches (785 x 29.9 x 491 mm)_without stand			
Weight	24.25 lbs (11kg)_with stand 18.08 lbs (8.2kg)_without stand			
TV System	Tuning	Frequency Synthesize (Refer to detailed Frequency Table)		
	System	PAL-M/NTSC/PAL-N		
	Sound	BTSC		
Environmental Considerations	Operating Temperature : 32°F ~ 122°F (0°C ~ 50°C) Operating Humidity : 20% ~ 90%, non-condensing Storage temperature : -4°F ~ 140°F (-20°C ~ 60°C) Storage Humidity : 10% ~ 90%			
Audio Spec.	<ul style="list-style-type: none"> - MAX Internal Audio Output Power : Each 10W(Left/Right) - Equalizer : 5band - Output Frequency : RF : 20 Hz ~ 15.4 kHz AV/Componet/HDMI : 20 Hz ~ 20 kHz

2-2. New Features explanation

■ Connecting Anynet+ Devices

Anynet+ is a function that enables you to control all connected Samsung devices that support Anynet+ with your Samsung TV's remote.

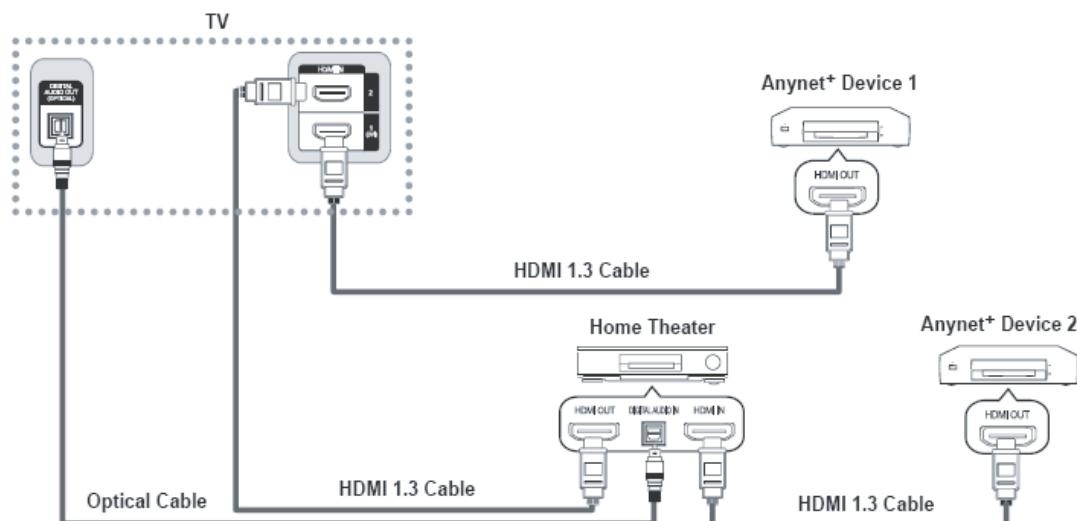

The Anynet+ system can be used only with Samsung devices that have the Anynet+ feature. To be sure your Samsung device has this feature, check if there is an Anynet+ logo on it.

To connect to a TV

1. Connect the HDMI IN 1(DVI), 2 jack on the TV and the HDMI OUT jack of the corresponding Anynet+ device using an HDMI cable.

To connect to Home Theater

1. Connect the HDMI IN 1(DVI), 2 jack on the TV and the HDMI OUT jack of the corresponding Anynet+ device using an HDMI cable.

2. Connect the HDMI IN jack of the home theater and the HDMI OUT jack of the corresponding Anynet+ device using an HDMI cable.

- Connect the Optical cable between the DIGITAL AUDIO OUT (OPTICAL) jack on your TV and the Digital Audio Input on the Home Theater.
- When following the connection above, the Optical jack only outputs 2 channel audio. You will only hear sound from the Home Theater's Front Left and Right speakers and the subwoofer. If you want to hear 5.1 channel audio, connect the DIGITAL AUDIO OUT (OPTICAL) jack on the DVD / Satellite Box (ie Anynet Device 1 or 2) directly to the Amplifier or Home Theater, not the TV.
- Connect only one Home Theater.
- You can connect an Anynet+ device using the HDMI 1.3 cable. Some HDMI cables may not support Anynet+ functions.
- Anynet+ works when the AV device supporting Anynet+ is in the Standby or On status.
- Anynet+ supports up to 12 AV devices in total. Note that you can connect up to 3 devices of the same type.

2-3. Accessories

Product	Description	Code. No	Remark
	Remote Control & Batteries (AAA x 2)	BN59-01020A	
	Power Cord	3903-000532	
	Cover-Bottom	32" BN63-06542A 40" BN63-06543A 46" BN63-06543A	
	Stand	32" BN96-12930B 40" BN96-12931B 46" BN96-12932B	Samsung Electronics Service center
	Screw (for the stand - M4, L6)	6003-000133	
	Owner's Instructions	BN68-02737A	
	Warranty Card / Registration Card / Safety Guide Manual (Not available in all locations)		

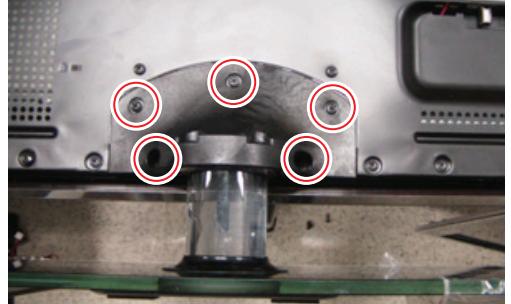

3. Disassembly and Reassembly

This section of the service manual describes the disassembly and reassembly procedures for the UN37C5000QM LCD TV.

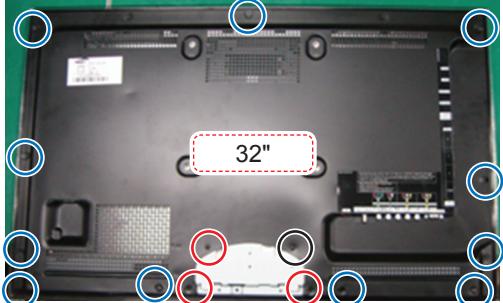

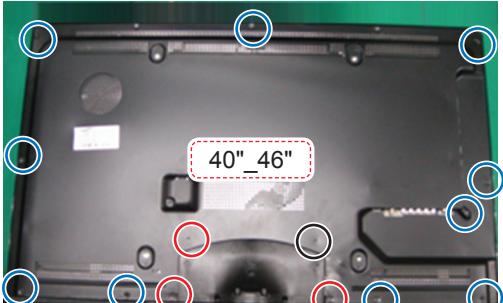

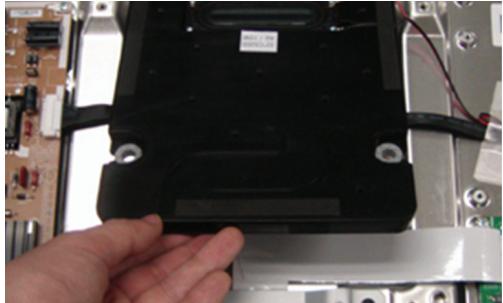

⚠ WARNING: This LED TV contains electrostatically sensitive devices. Use caution when handling these components.

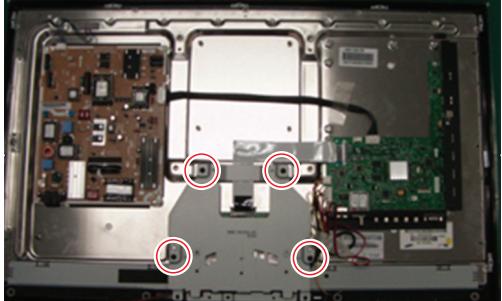

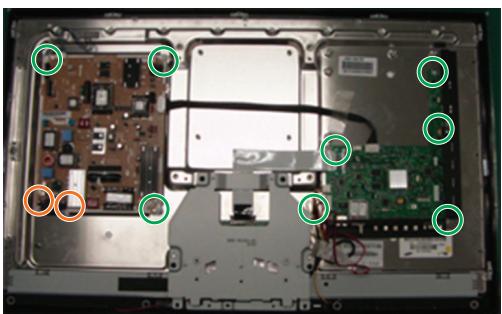

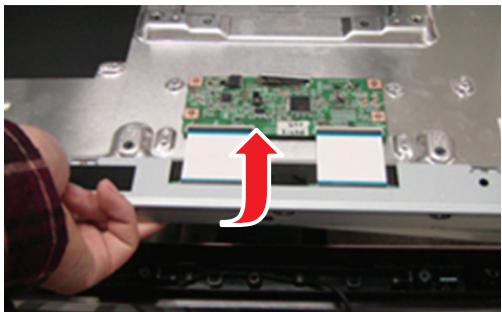

3-1. Disassembly and Reassembly

- ⚠ Cautions:**
1. Disconnect the LED TV from the power source before disassembly.
 2. Follow these directions carefully; never use metal instruments to pry apart the cabinet.

Description	Picture Description	Screws
<p>1. Place TV face down on cushioned table. Remove 5 screws from the stand. Remove stand.</p>		
		 6003-000133
		

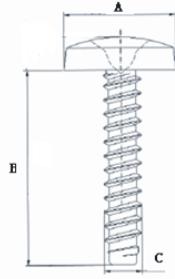

3. Disassembly and Reassembly

Description	Picture Description	Screws
<p>2. 32" C5000 : Remove the 15 screws of rear-cover. 40"/46" C5000 : Remove the 16 screws of rear-cover.</p>	 	 6003-000133  6003-001003
3. Lift up the rear-cover.		
4. Remove the speaker and Wooper.	 	

Description	Picture Description	Screws
5. Lift up the stand link. Remove the 4 screws of bracket stand link.		 6003-000133
6. Remove the 5 screws of main board and 5 screws of IP board.		 6001-002283  6001-000115
7. Lift up the panel.		

※ Reassembly procedures are in the reverse order of disassembly procedures.

Screw Size

Code No.	A (mm)	B (mm)	C (mm)	Q'ty	
6003-001003	8.3~8.4	12~12.4	4~4.15		
6003-000133	8.3~8.4	7.9~8.3	3.70~3.83		
6001-002283	6.3~6.5	5.0~5.6	2.87~8.98		
6001-000115	5.8~6.3	9.4~10.0	2.87~2.98		

4. Troubleshooting

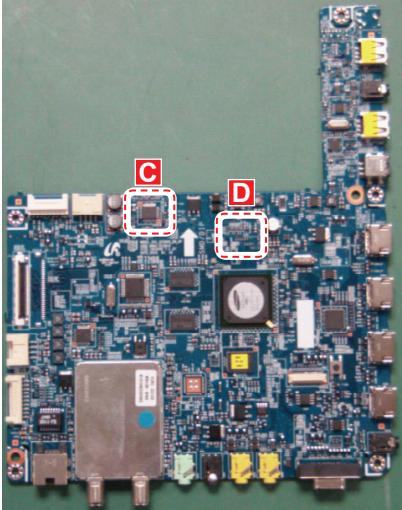

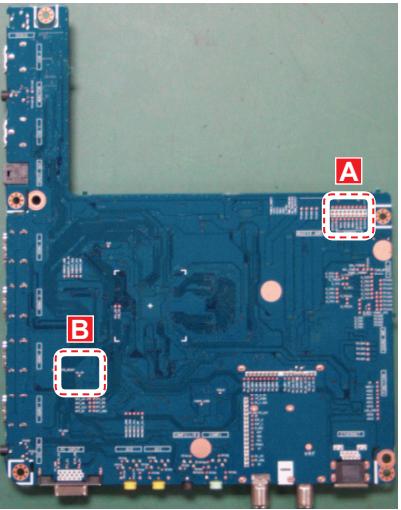

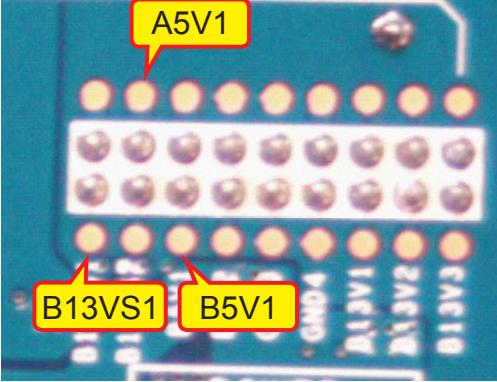

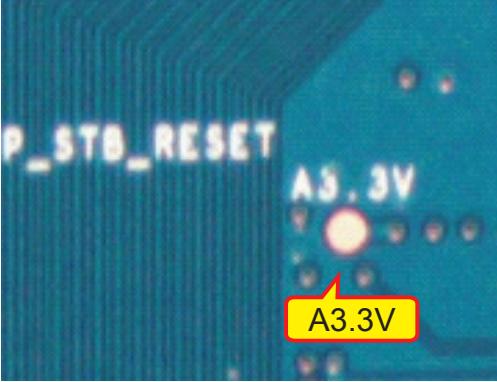

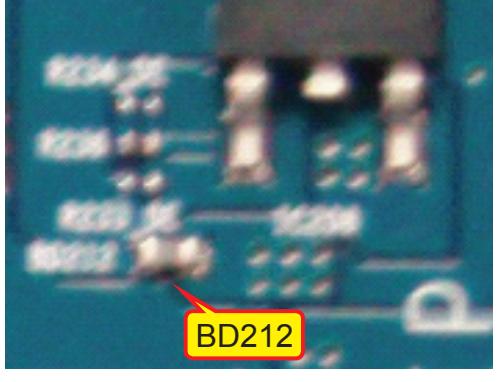

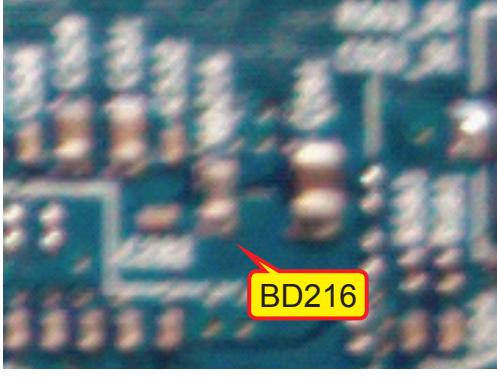

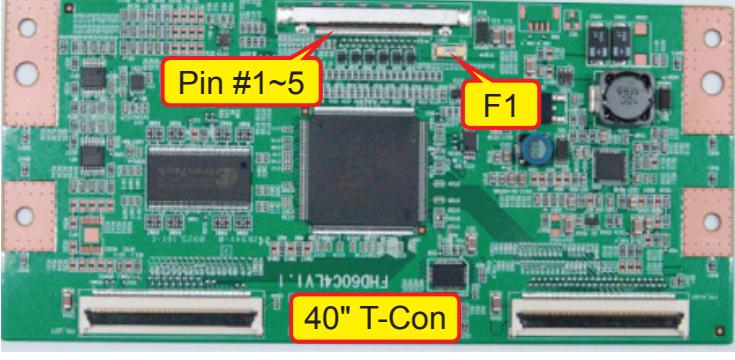

4-1. Troubleshooting

4-1-1. Previous check

1. Check the various cable connections first.
 - Check to see if there is a burnt or damaged cable.
 - Check to see if there is a disconnected or loose cable connection.
 - Check to see if the cables are connected according to the connection diagram.
2. Check the power input to the Main Board.

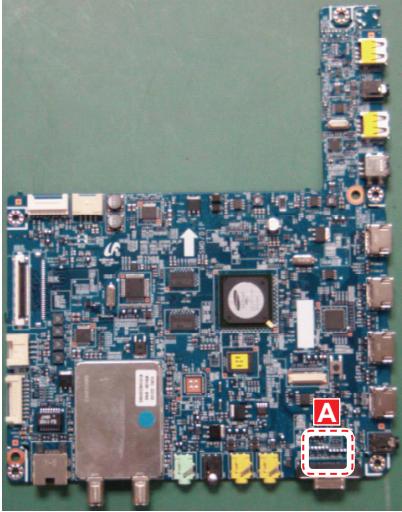

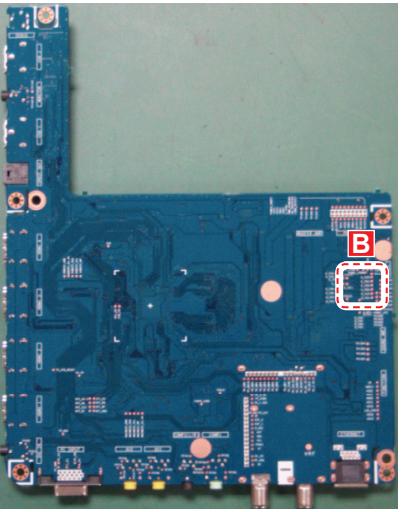

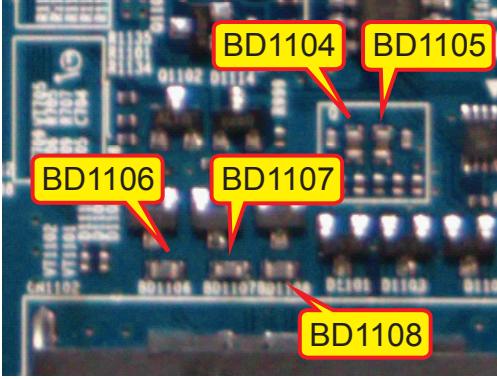

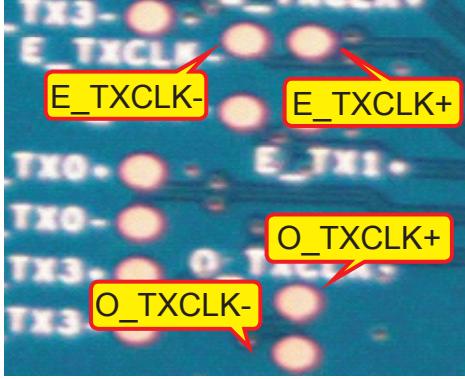

4-1-2. No Power

Symptom	<ul style="list-style-type: none"> The LEDs on the front panel do not work when connecting the power cord. The SMPS relay does not work when connecting the power cord. The unit appears to be dead.
Major checkpoints	<p>The IP relay or the LEDs on the front panel does not work when connecting the power cord if the cables are improperly connected or the Main Board or SMPS is not functioning. In this case, check the following:</p> <ul style="list-style-type: none"> Check the internal cable connection status inside the unit. Check the fuses of each part. Check the output voltage of SMPS. Replace the Main Board.
Diagnostics	<pre> graph TD A[Lamp(Backlight) Off, power indicator LED on?] -- No --> B[Change 18p power cable.] A -- Yes --> C[Does proper Stand-By DC A5V appear at TP - A5V1?] C -- No --> D[Change the Main Assy.] C -- Yes --> E[Does proper Main DC B13V, B5V appear at TP - B13VS1, B5V1?] E -- No --> F[Change the Main Assy.] E -- Yes --> G[Does proper DC A3.3V appear at TP - A3.3V?] G -- No --> H[Change the Main Assy.] G -- Yes --> I[Does proper B3.3V, B1.8V appear at BD216 (B3.3V), BD212 (B1.8V_PW) ?] I -- No --> J[Change the LVDS cable.] I -- Yes --> K[Does proper DC B13V appear at LVDS connector Pin #1~5 of T-con b'd?] K -- No --> L[Change the LVDS cable.] K -- Yes --> M[Does proper DC B12V appear at F1 of T-con b'd ?] M -- No --> N[Change the T-con b'd. (except for 4000 series)] M -- Yes --> O[A power is supplied to set?] O -- No --> P[Check a other function. (No picture part) Replace a LCD Panel.] O -- Yes --> Q[] </pre>
Caution	Make sure to disconnect the power before working on the IP board.

■ WAVEFORMS

4-2. Alignments and Adjustments

4-2-1. General Alignment Instruction

1. Usually, a color LCD-TV needs only slight touch-up adjustment upon installation.
Check the basic characteristics such as height, horizontal and vertical sync.
2. Use the specified test equipment or its equivalent.
3. Correct impedance matching is essential.
4. Avoid overload. Excessive signal from a sweep generator might overload the front-end of the TV. When inserting signal markers, do not allow the marker generator to distort test result.
5. Connect the TV only to an AC power source with voltage and frequency as specified on the backcover nameplate.
6. Do not attempt to connect or disconnect any wire while the TV is turned on. Make sure that the power cord is disconnected before replacing any parts.
7. To protect against shock hazard, use an isolation transformer.

4-3. Factory Mode Adjustments

4-3-1 Entering Factory Mode

To enter 'Service Mode' Press the remote -control keys in this sequence :

- If you do not have Factory remote - control

4-3-2 How to Access Service Mode

Using the Customer Remote

1. Turn the power off and set to stand-by mode
2. Press the remote buttons in this order; POWER OFF-MUTE-1-8-2-POWER ON to turn the set on.
3. The set turns on and enters service mode. This may take approximately 20 seconds.
4. Press the Power button to exit and store data in memory.
- If you fail to enter service mode, repeat steps 1 and 2 above.
5. Initial SERVICE MODE DISPLAY State

4-4. White Balance - Calibration

4-4-1 White Balance -Calibration

4-4-2 White Balance - Adjustment

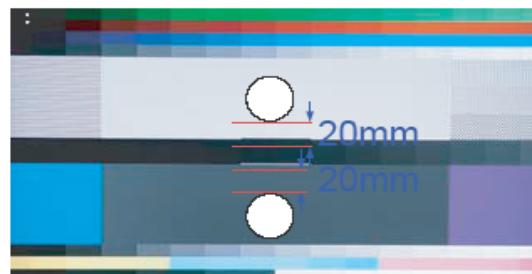

4-5. White Ratio (Balance) Adjustment

1. You can adjust the white ratio in factory mode (1:Calibration, 3:White-Balance).
2. Since the adjustment value and the data value vary depending on the input source, you have to adjust these in CVBS, Component 1 and HDMI 1 modes.
3. The optimal values for each mode are configured by default. (Refer to Table 1, 2)
It varies with Panel's size and Specification.

- Equipment : CS-210
- Pattern: MIK K-7256 #92 "Flat W/B Pattern" as standard
- Use other equipment only after comparing the result with that of the Master equipment.
- Set Aging time : 60min ↑

- Calibration and Manual setting for WB adjustment.

- HDMI : Calibration at #24 Chessboard Pattern → Manual adjustment #92 pattern (720p)
 COMP: Calibration at #24 Chessboard Pattern → Manual adjustment at #92 pattern (720p)
 CVBS: Calibration at #24 Chessboard Pattern → Manual adjustment at #92 pattern (NTSC)
- If finishing in HDMI mode, adjustment coordinate is almost same in AV/COMP mode.
 - White Balance Manual Adjustment

P-Mode	Adjustment Coordinate				
		x	y	Y (Luminance)	T(K) + MPCD
CVBS (NTSC)	H/L	272	278	- Sub_CT : 145(40")/160(46")	12,000 (± 0)
	L/L	272	278	- Sub_CT : 128(40",46")	12,000 (± 0)
COMP (720P)	H/L	272	278	- Sub_CT : 145(40")/160(46")	12,000 (± 0)
	L/L	272	278	- Sub_CT : 128(40",46")	12,000 (± 0)
HDMI (720P)	H/L	272	278	- Sub_CT : 145(40")/160(46")	12,000 (± 0)
	L/L	272	278	- Sub_CT : 128(40",46")	12,000 (± 0)

- Adjustment Specification

White Balance : High light (± 1), Low light (± 3)

Luminance : High light (Don't care), Low light (± 0.2 Ft/L)

4-6. Servicing Information

4-6-1 USB Download Method

Software Upgrade upgrades can be performed via broadcasting signal or by downloading the new firmware from samsung.com to a USB memory device.

Current Version is the software already installed in the TV.

Note Software is represented as 'Year/Month/Day_Version'.
Installing the latest version is recommended.

► **By USB:** Insert a USB drive containing the firmware upgrade file downloaded from samsung.com into the TV. Please be careful not to disconnect the power or remove the USB drive until upgrades is complete. The TV will turn off and on automatically after completing the firmware upgrade. When software is upgraded, video and audio settings you have made will return to their default settings. We recommend you to write down your settings so that you can easily reset them after the upgrade.

► **By Online:** Upgrades the software using the Internet.

Note First, configure your network.

For detailed procedures on using the Network Setup, refer to the 'Setting the Network' instructions.

Note If the internet connection doesn't operate properly, the connection may be broken.

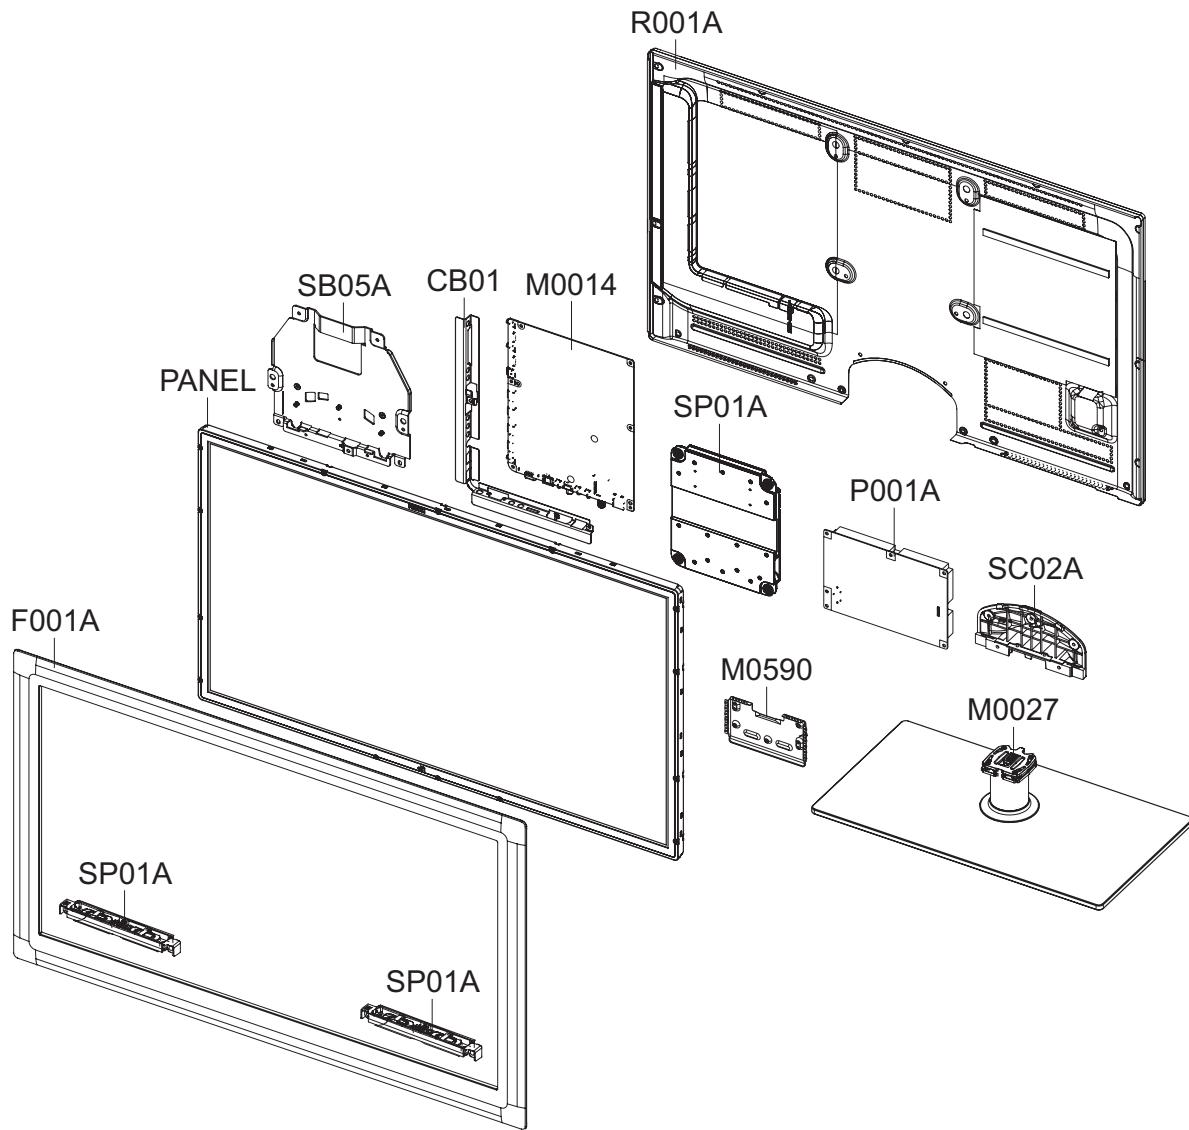

Please retry downloading. If the problem still happens, download by USB and upgrade.

► **Alternative Software (Backup):** If there is an issue with the new firmware and it is affecting operation, you can change the software to the previous version.

Note If software was changed, existing software is displayed.

6-3. Connector Functions

Connector	Functions
CN210 ↔ IP CNM802	Supply main power and dimming signal from IP board to Main Board.
CN1503_FFC ↔ T-CON CNF1	The LVDS signal transferred from Main Board to Panel .

6-4. Cables
