# 1. Precautions

## 1-1. Safety Precautions

Follow these safety, servicing and ESD precautions to prevent damage and to protect against potential hazards such as electrical shock.

### 1-1-1. Warnings

**WARNING** For continued safety, do not attempt to modify the circuit board.  
Disconnect the AC power and DC power jack before servicing.

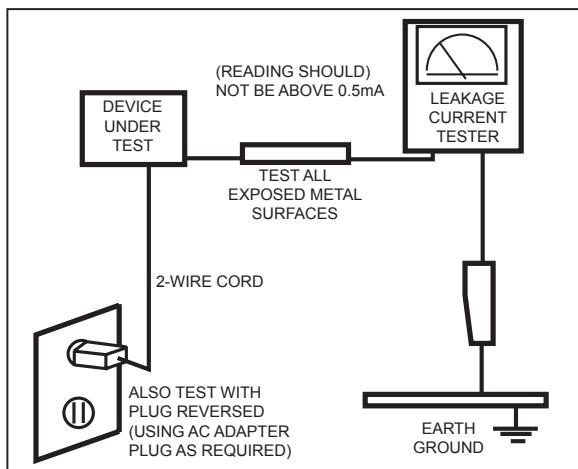

### 1-1-2. Servicing the LED TV

1. When servicing the LED TV, Disconnect the AC line cord from the AC outlet.
2. It is essential that service technicians have an accurate voltage meter available at all times. Check the calibration of this meter periodically.

### 1-1-3. Fire and Shock Hazard

Before returning the monitor to the user, perform the following safety checks:

1. Inspect each lead dress to make certain that the leads are not pinched or that hardware is not lodged between the chassis and other metal parts in the monitor.
2. Inspect all protective devices such as nonmetallic control knobs, insulating materials, cabinet backs, adjustment and compartment covers or shields, isolation resistorcapacitor networks, mechanical insulators, etc.
3. Leakage Current Hot Check:

Do not use an isolation transformer during this test.

Use a leakage current tester or a metering system that complies with American National Standards Institute (ANSI C101.1, Leakage Current for Appliances), and Underwriters Laboratories (UL Publication UL1410, 59.7).

4. With the unit completely reassembled, plug the AC line cord directly into a 120V AC outlet. With the unit's AC switch first in the ON position and then OFF, measure the current between a known earth ground (metal water pipe, conduit, etc.) and all exposed metal parts, including: metal cabinets, screwheads and control shafts. The current measured should not exceed 0.5 milliamp. Reverse the power-plug prongs in the AC outlet and repeat the test.

#### **1-1-4. Product Safety Notices**

Some electrical and mechanical parts have special safetyrelated characteristics which are often not evident from visual inspection. The protection they give may not be obtained by replacing them with components rated for higher voltage, wattage, etc. Parts that have special safety characteristics are identified by  on schematics and parts lists. A substitute replacement that does not have the same safety characteristics as the recommended replacement part might create shock, fire and/or other hazards. Product safety is under review continuously and new instructions are issued whenever appropriate.

## 1-2. Servicing Precautions

**WARNING**

An electrolytic capacitor installed with the wrong polarity might explode.

**CAUTION**

Before servicing units covered by this service manual, read and follow the Safety Precautions section of this manual.

**NOTE**

If unforeseen circumstances create conflict between the following servicing precautions and any of the safety precautions, always follow the safety precautions.

### 1-2-1. General Servicing Precautions

1. Always unplug the unit's AC power cord from the AC power source and disconnect the DC Power Jack before attempting to: (a) remove or reinstall any component or assembly, (b) disconnect PCB plugs or connectors, (c) connect a test component in parallel with an electrolytic capacitor.
2. Some components are raised above the printed circuit board for safety. An insulation tube or tape is sometimes used. The internal wiring is sometimes clamped to prevent contact with thermally hot components. Reinstall all such elements to their original position.
3. After servicing, always check that the screws, components and wiring have been correctly reinstalled. Make sure that the area around the serviced part has not been damaged.
4. Check the insulation between the blades of the AC plug and accessible conductive parts (examples: metal panels, input terminals and earphone jacks).
5. Insulation Checking Procedure: Disconnect the power cord from the AC source and turn the power switch ON. Connect an insulation resistance meter (500 V) to the blades of the AC plug. The insulation resistance between each blade of the AC plug and accessible conductive parts (see above) should be greater than 1 megohm.
6. Always connect a test instrument's ground lead to the instrument chassis ground before connecting the positive lead; always remove the instrument's ground lead last.

### 1-3. Static Electricity Precautions

Some semiconductor (solid state) devices can be easily damaged by static electricity. Such components are commonly called Electrostatically Sensitive Devices (ESD). Examples of typical ESD are integrated circuits and some field-effect transistors. The following techniques will reduce the incidence of component damage caused by static electricity.

1. Immediately before handling any semiconductor components or assemblies, drain the electrostatic charge from your body by touching a known earth ground. Alternatively, wear a discharging wrist-strap device. To avoid a shock hazard, be sure to remove the wrist strap before applying power to the monitor.
2. After removing an ESD-equipped assembly, place it on a conductive surface such as aluminum foil to prevent accumulation of an electrostatic charge.
3. Do not use freon-propelled chemicals. These can generate electrical charges sufficient to damage ESDs.
4. Use only a grounded-tip soldering iron to solder or desolder ESDs.
5. Use only an anti-static solder removal device. Some solder removal devices not classified as "anti-static" can generate electrical charges sufficient to damage ESDs.
6. Do not remove a replacement ESD from its protective package until you are ready to install it. Most replacement ESDs are packaged with leads that are electrically shorted together by conductive foam, aluminum foil or other conductive materials.
7. Immediately before removing the protective material from the leads of a replacement ESD, touch the protective material to the chassis or circuit assembly into which the device will be installed.

Be sure no power is applied to the chassis or circuit and observe all other safety precautions.

8. Minimize body motions when handling unpackaged replacement ESDs. Motions such as brushing clothes together, or lifting your foot from a carpeted floor can generate enough static electricity to damage an ESD.

## 1-4. Installation Precautions

1. For safety reasons, more than a people are required for carrying the product.
2. Keep the power cord away from any heat emitting devices, as a melted covering may cause fire or electric shock.
3. Do not place the product in areas with poor ventilation such as a bookshelf or closet. The increased internal temperature may cause fire.
4. Bend the external antenna cable when connecting it to the product. This is a measure to protect it from being exposed to moisture. Otherwise, it may cause a fire or electric shock.
5. Make sure to turn the power off and unplug the power cord from the outlet before repositioning the product. Also check the antenna cable or the external connectors if they are fully unplugged. Damage to the cord may cause fire or electric shock.
6. Keep the antenna far away from any high-voltage cables and install it firmly. Contact with the highvoltage cable or the antenna falling over may cause fire or electric shock.
7. When installing the product, leave enough space (0.4m) between the product and the wall for ventilation purposes. A rise in temperature within the product may cause fire.
8. If an equipment is provided with a replaceable battery, and if replacement by an incorrect type could result in an explosion (for example, with some lithium batteries), the following applies:

- Risk of explosion if battery is replaced by an incorrect type dispose of used batteries according to the instructions.
- Do not dispose of batteries in a fire.
- Do not short circuit, disassemble or overheat the batteries.
- Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type.
- Do not be exposed to excessive heat such as sunshine, fire or the like.

## 2. Product Specifications

### 2-1. Product Information

#### 2-1-1. Model Comparison

Model	UN**F5500		
Front View	 <p>* W : Width H : Height D : Depth</p>		
Detail View			
Front Color	Black (Panel)		
Dimensions (W x H x D)	32"	Set with Stand	738.0 x 509.6 x 265.0 mm / 29.1 x 20.1 x 10.4 inches
		Set without Stand	738.0 x 445.4 x 49.0 mm / 29.1 x 17.5 x 1.9 inches
	40"	Set with Stand	928.2 x 615.5 x 265.0 mm / 36.5 x 24.2 x 10.4 inches
		Set without Stand	928.2 x 552.3 x 49.4 mm / 36.5 x 21.7 x 1.9 inches
	46"	Set with Stand	1059.6 x 700.0 x 307.3 mm / 41.7 x 27.6 x 12.1 inches
		Set without Stand	1059.6 x 626.2 x 49.4 mm / 41.7 x 24.7 x 1.9 inches
	50"	Set with Stand	1135.4 x 741.8 x 307.3 mm / 44.7 x 29.2 x 12.1 inches
		Set without Stand	1135.4 x 668.0 x 49.8 mm / 44.7 x 26.3 x 2.0 inches

## 2. Product specifications

### 3. Disassembly and Reassembly

This section of the service manual describes the disassembly and reassembly procedures for the LED TV.

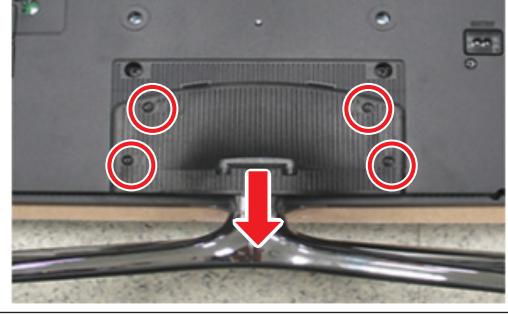

**WARNING**

This LED TV contains electrostatically sensitive devices. Use caution when handling these components.

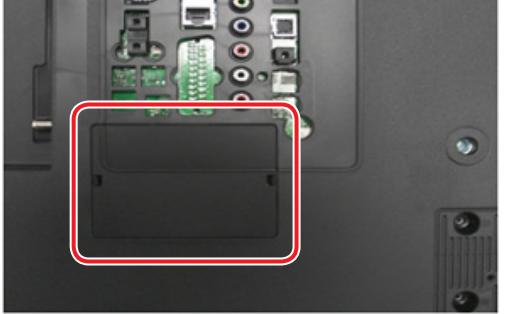

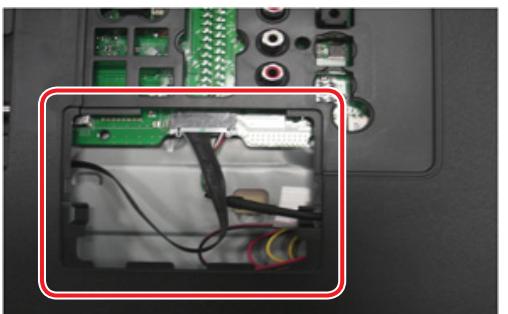

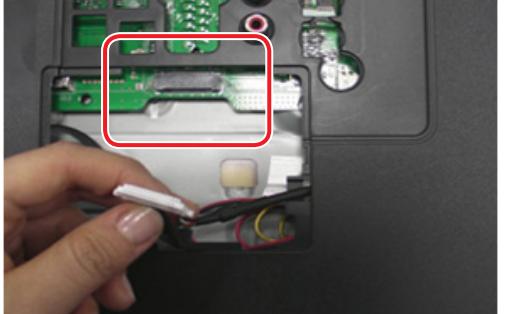

**CAUTION**

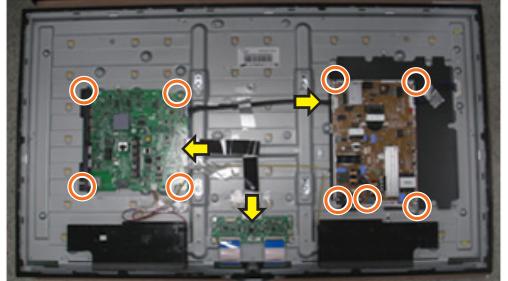

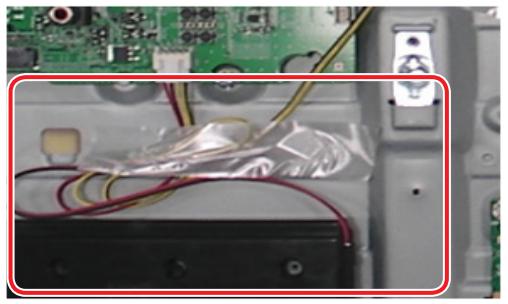

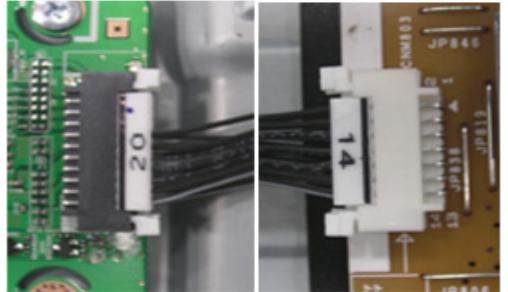

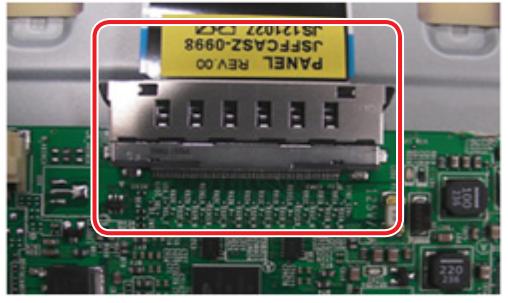

1. Disconnect the LED TV from the power source before disassembly.
2. Follow these directions carefully; never use metal instruments to pry apart the cabinet.
3. If there is no additional comment, it is same for all inches.

## 3-2. Assy Board P-Jog Switch & Ir

### ■ How to disassembly

Description	Picture Description	Refer
<p><b>1</b> Loosen 2 screws.</p>		
<p><b>2</b> Pull out a jog function.</p>		

## ■ How to assembly

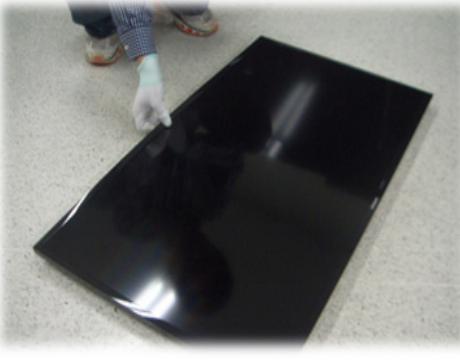

Description	Picture Description	Refer
1 Insert a jog function.		
2 Put 2 screws.		
3 Press the function assy into the cabinet until locked.		

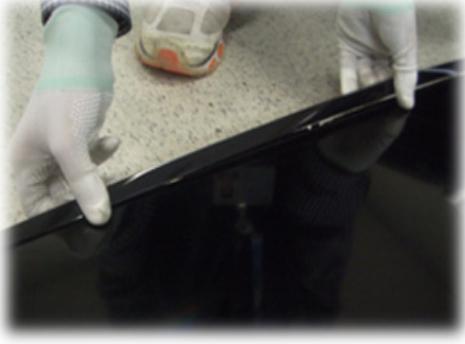

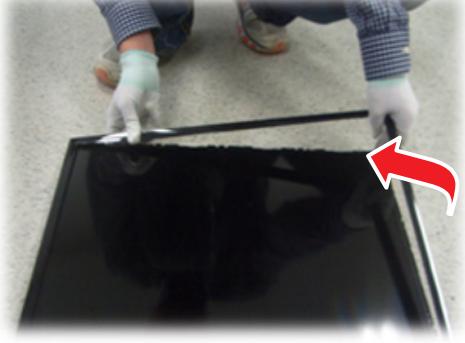

When you want to ignore the funtion key actions

Option	Config Option	Navigation Key Func	0 way : New Function (Naviagtion) Key <span style="color:red;">●</span> [ Default ]

Advanced			

### 3-3. Disassembly(PTC)

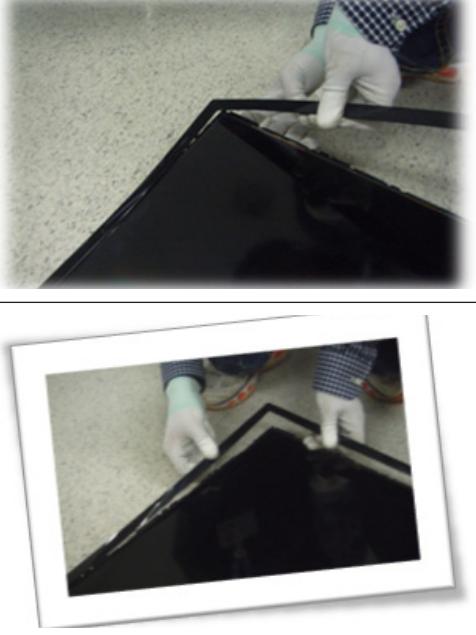

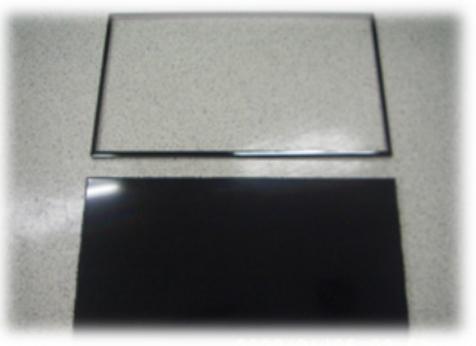

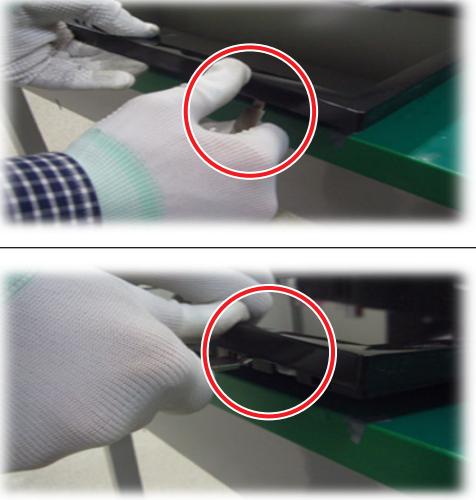

#### ■ How to disassembly

Description	Picture Description	Refer
<p>1 Place TV face up on cushioned table.</p>		
<p>2 Products at the top of the central TOP-CHASSIS is rotated by 45 degrees outward and pulls.</p>	 	

Description	Picture Description	Refer
<b>3</b> Pull in the same way from the center of the top.	 	
<b>4</b> Pull the left part of the product as shown while holding the raised portion on figure 3.		
<b>5</b> Pull the bottom part of the product as figure 2 while holding the raised portion on figure 4.		

### 3. Disassembly and Reassemble

Description	Picture Description	Refer
<p><b>6</b> As shown in the picture, Lift the bottom of the TOP-CHASSIS.</p>	 	
<p><b>7</b> Pull the products at the bottom of the right side of the chassis.</p>	 	

Description	Picture Description	Refer
<p><b>8</b> Lift the bottom of the chassis with one hand and holding the bottom of the product after you pull the right side of the product chassis.</p>		
<p><b>9</b> Disassembly is complete.</p>		
<p><b>! CAUTION</b> To use JIG : Does not lift the chassis by hand, JIG using the lift.</p>		

Reassembly procedures are in the reverse order of disassembly procedures.

## 4. Troubleshooting

### 4-1. Troubleshooting

#### ■ Previous Check

1. Check the various cable connections first.
  - Check to see if there is a burnt or damaged cable.
  - Check to see if there is a disconnected or loose cable connection.
  - Check to see if the cables are connected according to the connection diagram.
2. Check the power input to the Main Board.
3. How to distinguish if the problem is caused by Main Board or T-Con Board.
  - **No Video** : If the problem is No Video but BLU is on and Indication LED is blinking repeatedly and faster than normal booting, replace the T-Con Board.
  - **Distorted Picture** : Check the inner patterns.

#### For All mode

X12	FOX_FT1 FRC Post	Picture	Problem
OK	OK	NG	Main Board or Signal Source
NG	OK	NG	Main Board
NG	NG	NG	Main or LVDS cable or T-con or Panel

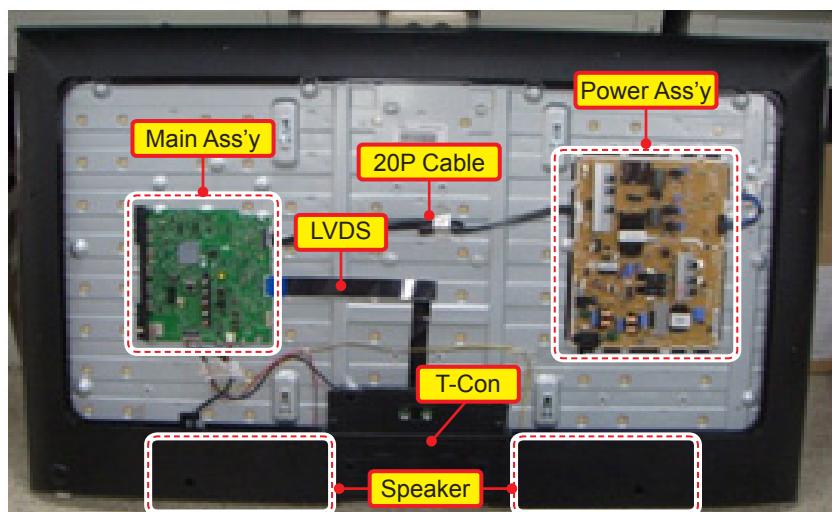

#### Only for HDMI mode (additional check)

HDMI	Picture	Problem
OK	NG	There is no problems after HDMI IC check HDMI source or HDMI jack.
NG	NG	There is no problems before HDMI IC check Genoas pattern or LVDS cable or T-con.

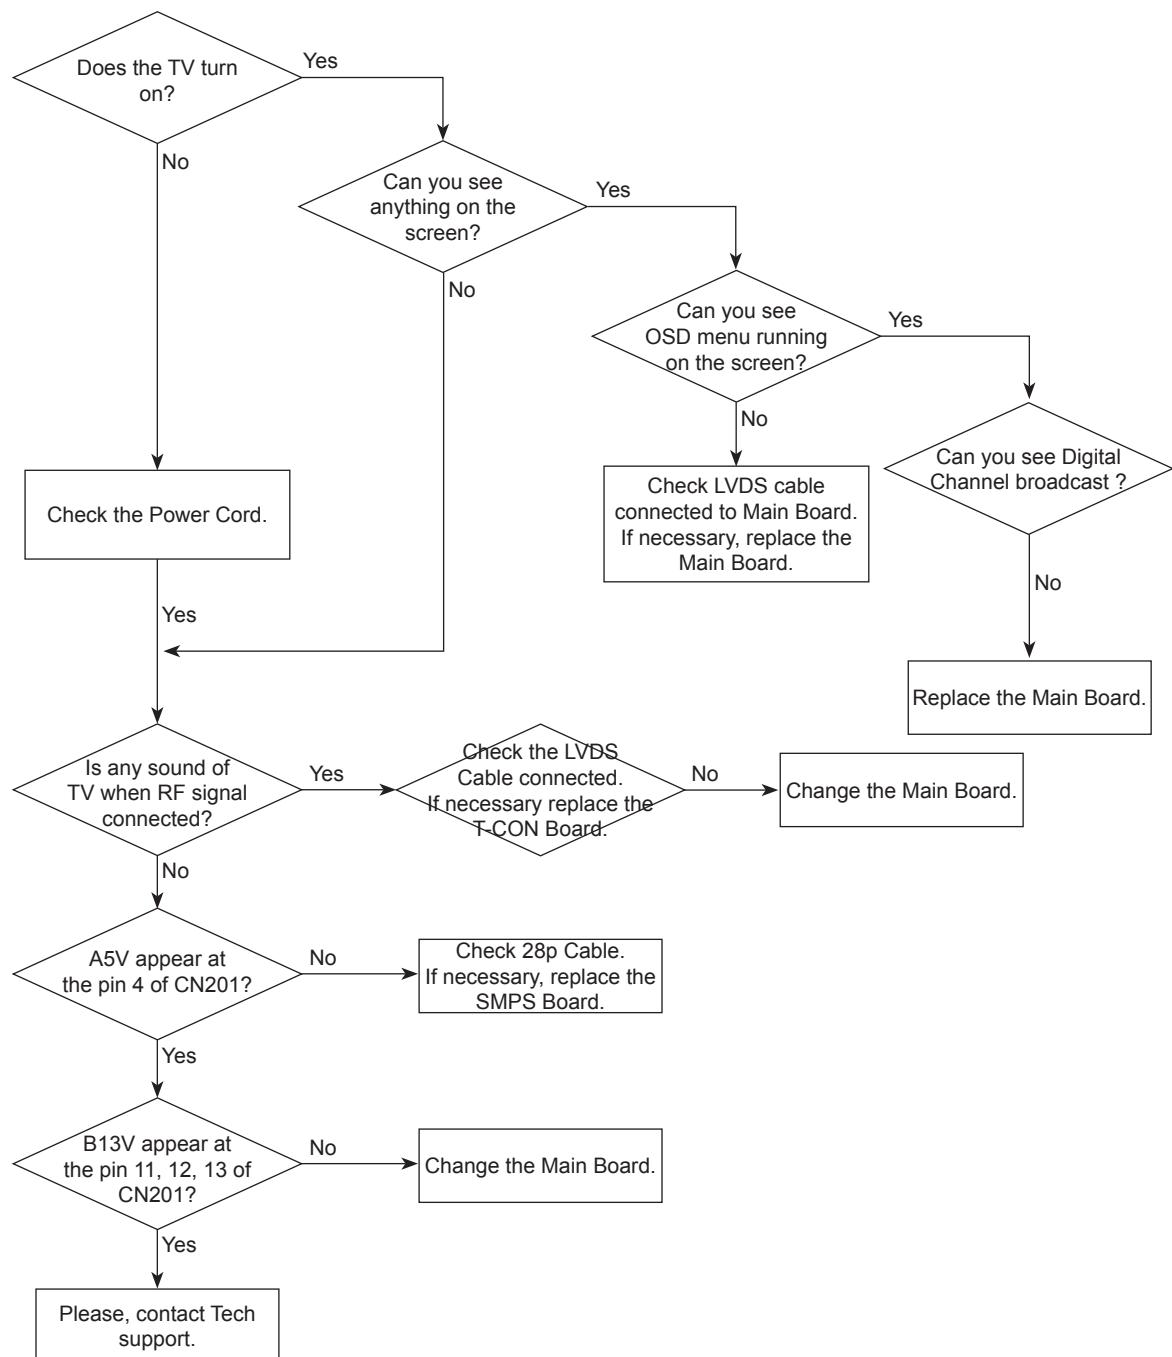

#### ■ How to check inner pattern?

1. Factory mode. (1 → 8 → 2 → Power on when TV is in 'stand-by mode')
2. Move to SVC menu.
3. Move to Test Pattern.
4. Check inner patterns.

■ Inside View

## ■ Simple flow chart of malfunction

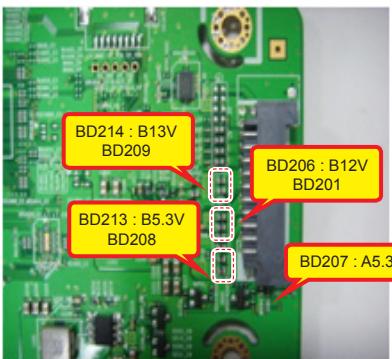

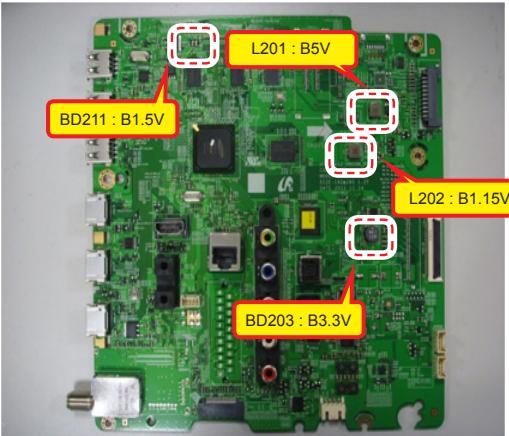

## 4-2. How to Check Fault Symptom

### ■ NO Power

\*Refer to the next page to check the location such as CN201 or IC201 SVC Manual mentioned.

Symptom	<ul style="list-style-type: none"> <li>The LEDs on the front panel do not work when connecting the power cord.</li> <li>The SMPS relay does not work when connecting the power cord.</li> <li>The unit appears to be dead.</li> </ul>
Major checkpoints	<p>The IP relay or the LEDs on the front panel does not work when connecting the power cord if the cables are improperly connected or the Main Board or SMPS is not functioning. In this case, check the following:</p> <ul style="list-style-type: none"> <li>Check the internal cable connection status inside the unit.</li> <li>Check the fuses of each part.</li> <li>Check the output voltage of SMPS.</li> <li>Replace the Main Board.</li> </ul>

## ■ No Video (HDMI 1, 2, 3 - Digital Signal)

\*Refer to the next page to check the location such as CN201 or IC201 SVC Manual mentioned.

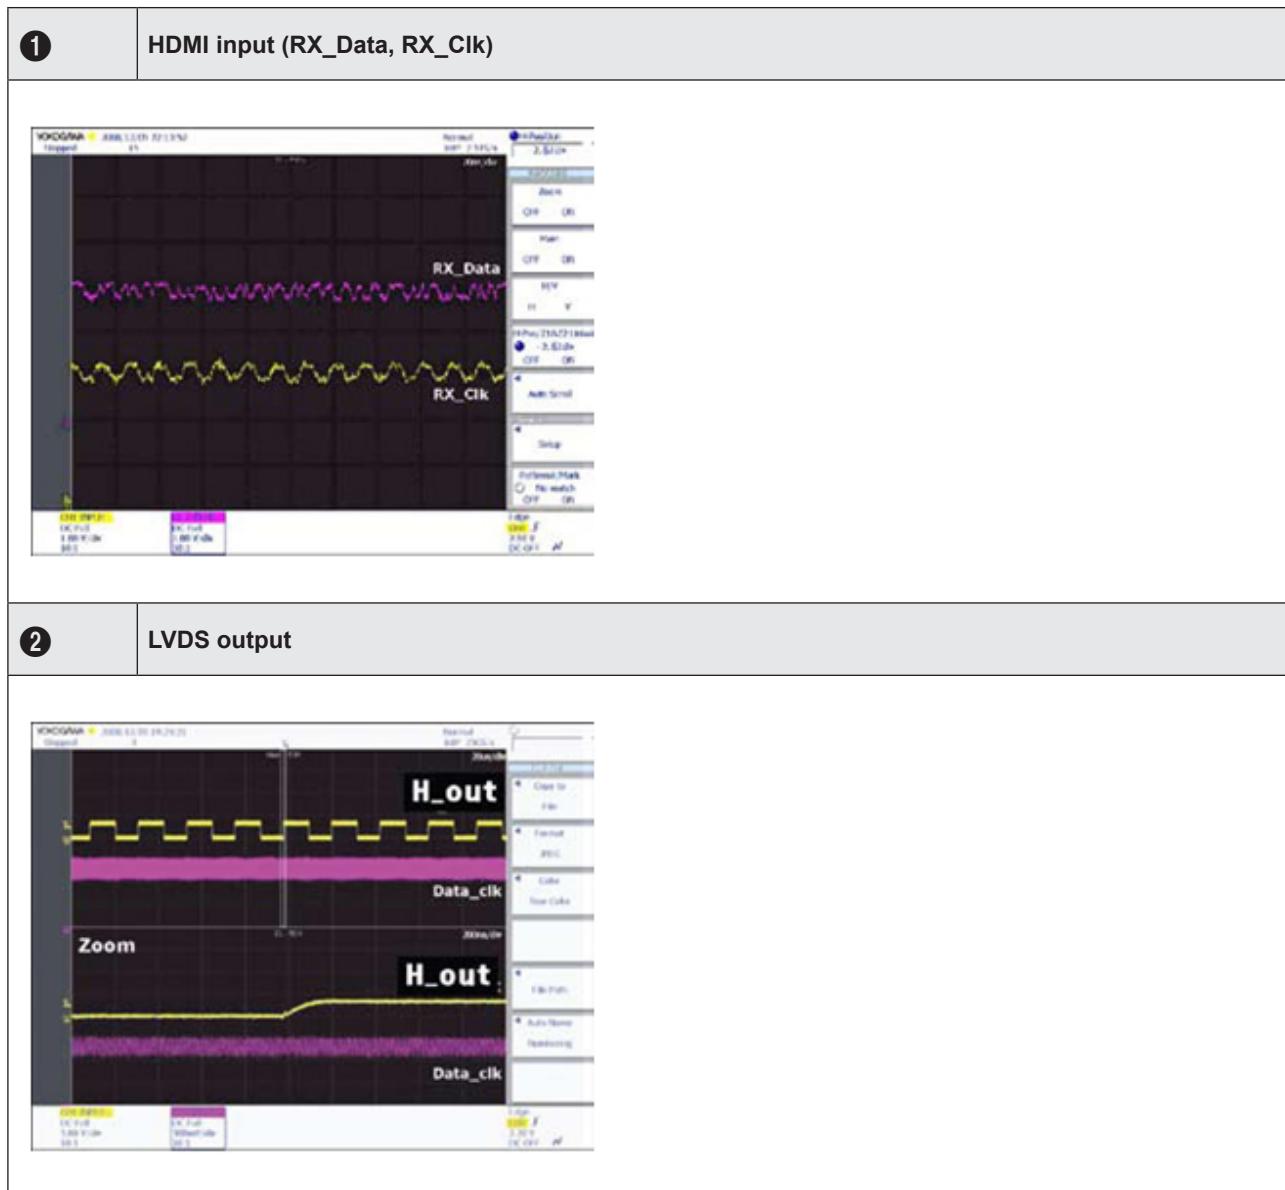

<b>Symptom</b>	<ul style="list-style-type: none"> <li>• Audio is normal but no picture is displayed on the screen.</li> </ul>
<b>Major checkpoints</b>	<ul style="list-style-type: none"> <li>• Check the HDMI source.</li> <li>• Check the HDMI switch.</li> <li>• This may happen when the LVDS cable connecting the Main Board and the Panel is disconnected.</li> </ul>
<b>Diagnostics</b>	<pre> graph TD     A["Power indicator LED is off. Lamp(Backlight) on, no video ?"] -- Yes --&gt; B["Check the HDMI source and check the connection of HDMI cable ?"]     A -- No --&gt; C["Check a set in the 'Stand-by mode'."]     B -- Yes --&gt; D["Check the signal at Input of Main board ? HDMI1 Clk : Pin #10, #12 of CN602_H2 DATA : Pin #7, #9, #4, #6, #1, #3 of CN602_H2 HDMI2 Clk : Pin #10, #12 of CN603_H3 DATA : Pin #7, #9, #4, #6, #1, #3 of CN603_H3 HDMI3 Clk : Pin #10, #12 of CN604_H4 DATA : Pin #7, #9, #4, #6, #1, #3 of CN604_H4 HDMI4 Clk : Pin #10, #12 of CN601_H1 DATA : Pin #7, #9, #4, #6, #1, #3 of CN601_H1"]     B -- No --&gt; E["Input the HDMI signal properly."]     D --&gt; F["Check CN601~4. Check HDMI cable. Change the Main Ass'y or Check IC1001(X12). Change the Main Ass'y."]     D --&gt; G["Check IC1001(X12). Change the Main Ass'y."]     D --&gt; H["Please, Contact Tech support."]     F --&gt; I["Check the LVDS clk signal at output of Main board.(TX) TX2_CLK : ODD_TXCLK_DN/DP TX4_CLK : EVEN_TXCLK_DN/DP"]     I -- Yes --&gt; J["Check the LVDS cable? Replace the T-con / LCD panel?"]     I -- No --&gt; K["Please, Contact Tech support."]   </pre> <p>The flowchart starts with checking if the power indicator LED is off and the lamp/backlight is on. If yes, it checks the HDMI source and connection. If no, it checks a set in stand-by mode. If the source and connection are good, it inputs the HDMI signal properly. Then, it checks the signal at the main board's input for four HDMI ports, detailing pin assignments for each. If any port fails, it checks CN601~4, the HDMI cable, or the main assembly. If the signal is good, it moves to step 2. Step 2 checks the LVDS clock signals at the TX output of the main board. If they are good, it checks the LVDS cable or replaces the T-con/LCD panel. If they are bad, it contacts tech support.</p>
<b>Caution</b>	Make sure to disconnect the power before working on the IP board.

## 4-4. White Balance

### 4-4-1. Calibration

1. Into the Factory Mode.
2. Select SVC Menu.
3. Select ADC/WB menu.
4. Select ADC menu.

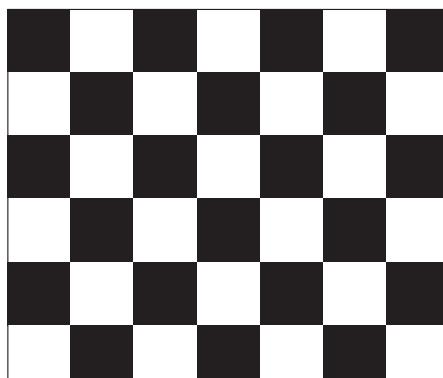

### 4-4-2. Service Adjustment

You must perform Calibration in the Lattice Pattern before adjusting the White Balance.

#### ■ Color Calibration

- Adjust Specification

Source	Setting Mode	Pattern	Use Equipment
HDMI	1280 x 720@60 Hz	Pattern #24 (Chess Pattern)	CA210 & Master MSPG925 Generator

(Chess Pattern)

- Use other equipment only after comparing the result with that of the Master equipment.

Input mode	Calibration	Pattern
CVBS IN (Model_#1)	Perform in NTSC B&W Pattern #24	Lattice
Component IN (Model_#6)	Perform in 720p B&W Pattern #24	Lattice
PC Analog IN (Model_#21)	Perform in VESA XGA (1024x768) B&W Pattern #24	Lattice
HDMI IN	Perform in 720p B&W Pattern #24	Lattice

## ■ Method of Color Calibration (AV)

1. Apply the NTSC Lattice (N0. 3) pattern signal to the AV IN 1 port.
2. Press the Source key to switch to “AV1” mode.
3. Enter Service mode.
4. Select the “ADC” menu.
5. Select the “AV Calibration” menu.
6. In “AV Calibration Off” status, press the “▶” key to perform Calibration.
7. When Calibration is complete, it returns to the high-level menu.
8. You can see the change of the “AV Calibration” status from Failure to Success.

## ■ Method of Color Calibration (Component)

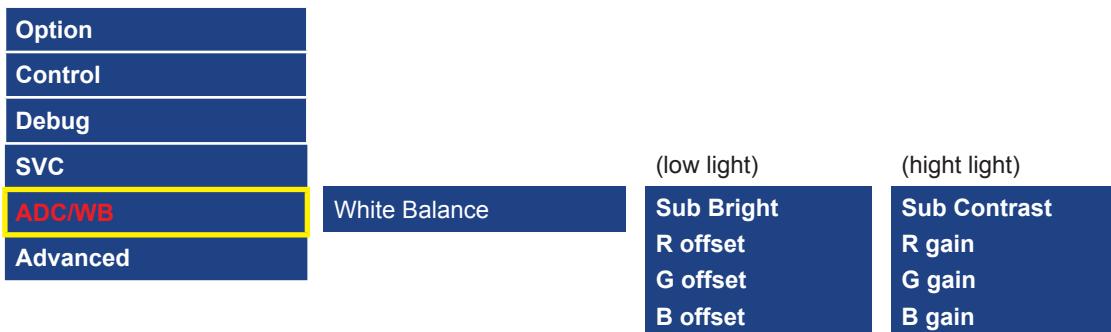

1. Apply the 720p Lattice (N0. 6) pattern signal to the Component IN 1 port.
2. Press the Source key to switch to “Component1” mode.
3. Enter Service mode.
4. Select the “ADC” menu.
5. Select the “Comp Calibration” menu.
6. In “Comp Calibration Off” status, press the “▶” key to perform Calibration.
7. When Calibration is complete, it returns to the high-level menu.
8. You can see the change of the “Comp Calibration” status from Failure to Success.

## ■ Method of Color Calibration (HDMI)

1. Apply the 720p Lattice (N0. 6) pattern signal to the HDMI1/DVI IN port.
2. Press the Source key to switch to “HDMI1” mode.
3. Enter Service mode.
4. Select the “ADC” menu.
5. Select the “HDMI Calibration” menu.
6. In “HDMI Calibration Off” status, press the “▶” key to perform Calibration.
7. When Calibration is complete, it returns to the high-level menu.
8. You can see the change of the “HDMI Calibration” status from Failure to Success.

### 4-4-3. Adjustment

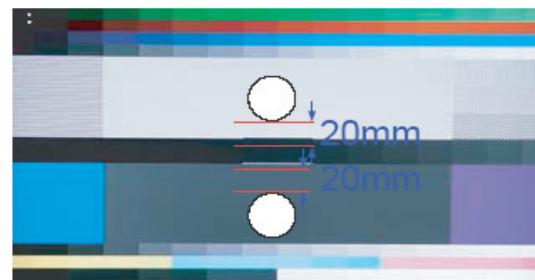

1. Into the Factory Mode.
2. Select **SVC** Menu.
3. Select **ADC/WB** menu.
4. Select **White Balance** menu.

## 4-5. White Ratio (Balance) Adjustment

1. You can adjust the white ratio in factory mode (1:Calibration, 3:White-Balance).
2. Since the adjustment value and the data value vary depending on the input source, you have to adjust these in CVBS, Component 1 and HDMI 1 modes.
3. The optimal values for each mode are configured by default. It varies with Panel's size and Specification.

- Equipment : CS-210
- Pattern: MIK K-7256 #92 "Flat W/B Pattern" as standard
- Altenate Equipmet : CA200& anyone Master supported pattern#92(refer to right photo)
- Use other Equipment only after comparing the result with that of the Master equipment.
- Set Aging time : 60 min

### Calibration and Manual setting for WB adjustment

- HDMI : Calibration at #24 Chessboard Pattern Manual adjustment at #92 pattern (720p)
- COMP: Calibration at #24 Chessboard Pattern Manual adjustment at #92 pattern (720p)
- CVBS: Calibration at #24 Chessboard Pattern Manual adjustment at #92 pattern (NTSC)

#### Note

If finishing in HDMI mode, adjustment coordinate is almost same in AV/COMP mode.

### White Balance Manual adjustment

## 4-8. Software Upgrade

Software Upgrade can be performed by downloading the latest firmware from [samsung.com](http://samsung.com) to a USB memory device.

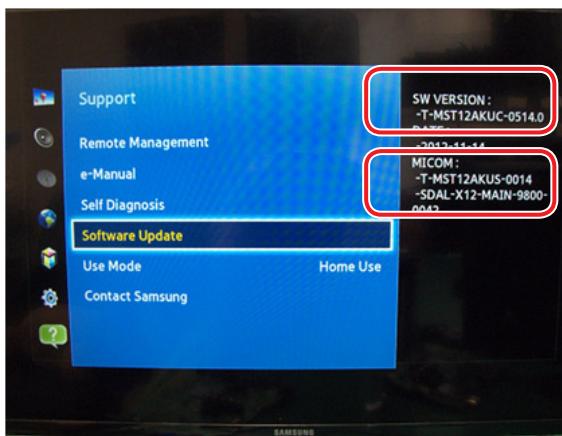

- Current Version - The software already installed in the TV.

Software is represented as 'Year/Month/Day\_Version'.

### 4-8-1. How to Check the Software Version

#### ■ Use the Main Menu

1. Click the "MENU" key in remote controller.
2. Select "Support" menu.
3. Locate the menu cursor "Software Upgrade" menu.
4. Click the "INFO" key.
  - Check the Main SW and Micom version.

## ■ Use the Factory Mode

### Access the factory mode

Option	
Control	T-MST12AKUC-xxxx T-MST12AKUS-xxxx
Debug	BT Version : xxxx Camera Version : xxxx

## 4-8-2. How to Upgrade Software and Micom

Insert a USB drive containing the firmware upgrade downloaded from [samsung.com](http://samsung.com) into the TV. Please be careful not to disconnect the power or remove the USB drive while upgrades are being applied. The TV will turn off and turn on automatically after completing the firmware upgrade. Please check the firmware version after the upgrades are complete (the new version will have a higher number than the older version). When software is upgraded, video and audio settings you have made will return to their default (factory) settings. We recommend you write down your settings before beginning firmware update. After update is completed, restore your previous settings.

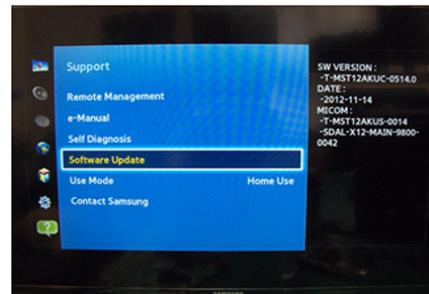

### ■ Main Software Upgrade

1. Store the sw program named "T-MST12AKUC" in USB memory stick.
  - Connect the USB.

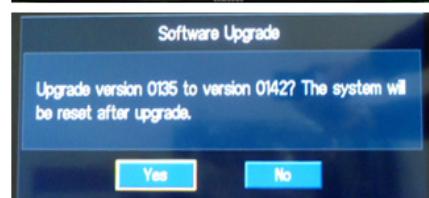

2. Click the "MENU" key in Remote Controller.
3. Select "Support" menu.

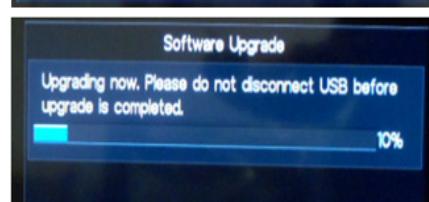

Locate the menu cursor "Software Update" menu

4. Click the "ENTER" key.

5. Click the "ENTER" key.
  - Wait for upgrade complete.
  - Check the Software Version.

## TV Factory Menu Guide as Diagnostic tool

### 1) How to access the Factory Menu

[Using Factory Remote]		[Using regular IR Remote]
Press the Info and Factory Buttons sequentially on a Factory Remote. (Part Number: AA81-00243A)	※ If the TV has the Universal Remote setup implemented, the Info button works as an Info button for the connected device.	Press the Mute - 1 - 8 -2 - Power On buttons sequentially on a normal Remote while the TV is off.  ※ If you access the Factory Menu with a normal Remote, some menus are deactivated.

### [Factory Main Menu]

SmartHub Used:</b> Smart Hub version and DUID info</li><li><b>8. Watchdog:</b> Watchdog Count Number</li></ol>

## 2) How to check Error Count (ER Count)

- ER Count should be checked first. This will help you troubleshoot intermittent power cycle issues and Wi-Fi/BT/MOIP module issues.

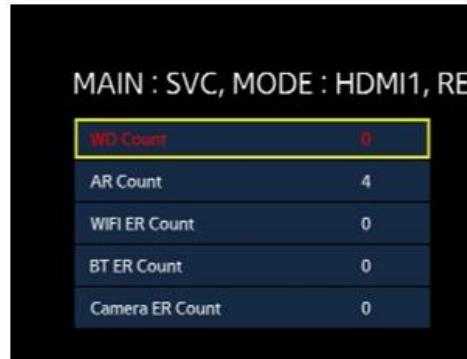

- Go to Factory Menu > SVC > ER Count menu.

### 1) 2012 Smart TV

- WD/AR Count: Factory Menu>Control>Sub Control
- WIFI/BT ER Count: Factory Menu>SVC>ER Count

### 2) 2013 Smart TV

- All Error Count: Factory Menu>SVC>ER Count

#### 1. WD Count (Watch Dog Count):

- TV turns off and on to protect itself from a Micom crash.

#### 2. AR Count (Auto Reset Count):

- TV turns off and on to protect itself from a Main CPU crash.

#### 3. WIFI ER Count

- Wi-Fi Module error count. If Wireless MAC is missing on Menu>Support>Contact Samsung and WIFI ER Count is high, replace the Wi-Fi module.

#### 4. BT ER Count(Bluetooth Error Count):

- Bluetooth module error count. If BT MAC address is missing on Menu>Support>Contact Samsung and BT ER Count is high, replace the Bluetooth module.

#### 5. Camera ER Count:

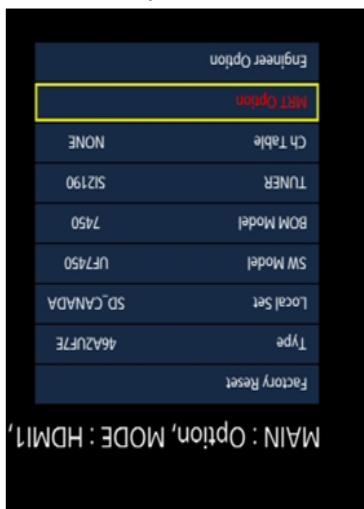

- Built-In Camera or Mic.(MOIP) error count. If the Camera version number is empty on Menu>Support>Contact Samsung , replace the Camera & Mic module (MOIP).

## 3) How to resolve the Picture Flip issue

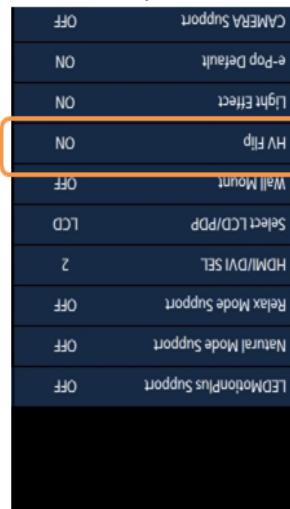

After Panel/Main board replacement, the picture can be flipped even if the Panel Type is set correctly. To fix this, follow these steps:

- Smart Hub TVs: Go to Factory Menu > MRT Option, and then select HV Flip.
- Non SmartHub TVs : Go to Factory Menu > Control > Sub Option, and then select Mirror.

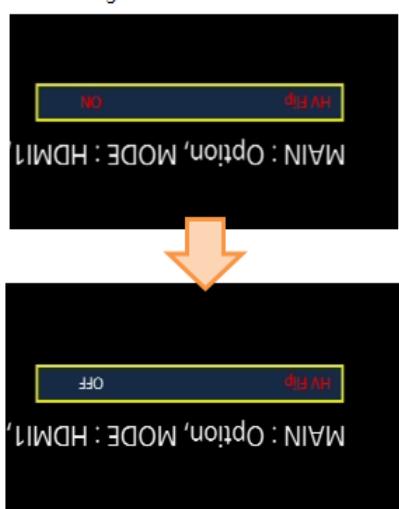

#### 1. Go to MRT Option.

#### 2. Select HV Flip.

#### 3. Change On to Off.

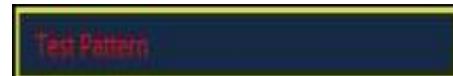

#### 4. TV Power Off->ON

#### 4) How to check Test Patterns

For any video issues, Test Patterns generated from Mainboard and Pre/Post FRC of T-Con Board should be verified in the Factory menu.

For 2013 TVs, some test patterns are also available in the TV menu (Menu>Support>Self Diagnosis>Picture Test).

1. Go to Factory Menu > SVC and select Test Pattern

2. Select a Test Pattern, and then press the Right arrow button to View/Change patterns.

<b>Pattern Sel ①</b>	<b>OFF</b>
Logic Pattern Sel	...
Logic Level Sel	...
FRC Pre Test Pattern ②	0
FRC Post Test Pattern ③	0
SOC TCON Test Pattern ④	0
SOC TCON Pattern Level	255
SOC TCON FRC Pattern	0
HDMI WB Pattern	OFF
HDMI Pattern Sel	0

★ The Pattern menu is shared by all products and models. However, some patterns do not work or are not available in some models. The following patterns should be used for LED TV video troubleshooting.

① **Pattern Sel**

- Test Pattern from the Mainboard.

② **FRC Pre Test Pattern**

- Test Pattern from the Pre-component of the FRC module in the T-Con Board

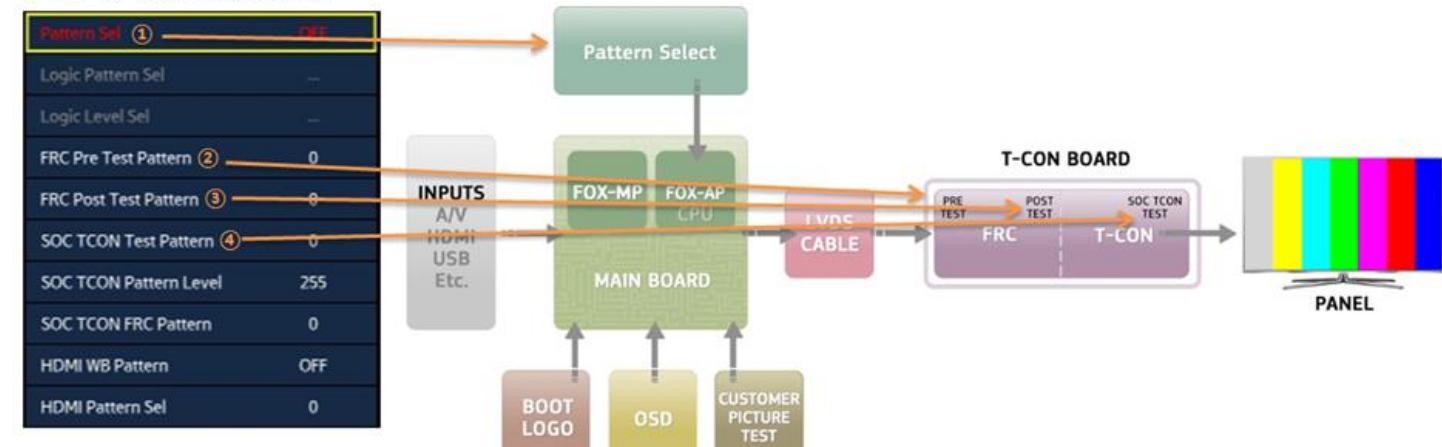

③ **FRC Post Test Pattern**

- Test Pattern from the Post-component of the FRC module in the T-Con Board

④ **SOC TCON Test Pattern**

- Test Pattern from the Timing Control module in the T-Con Board

#### ★ LED TV Video Signal Path

The Mainboard sends an important Processed Video Signal through the LVDS to the FRC/T-CON Board and then to the Panel. To troubleshoot any video issue, follow these steps:

- Verify "Pattern Sel" (Main Board)
- Verify "FRC Pre Test Pattern" (beginning of FRC in T-CON)
- Verify FRC Post Test Pattern" (end of FRC in T-CON)
- Verify "SoC TCON Test Pattern" (at T-CON Processor)

\* The same functions are embedded in the Self Diagnosis Picture Test  
(Menu - Support - Self Diagnosis).

Mainboard [Pattern1]	T-Con. Pre [Pattern2]	T-Con. Post [Pattern3]	Test Result	Problem
Pass	Pass	Pass		Signal Source / Cable Connection
Fail	Pass	Pass		Mainboard
Fail	Fail	Pass		T-Con. Board / LVDS Cable
Fail	Fail	Fail		Panel

### 5) How to run a Hardware Self Diagnosis

You can see the results of Hardware self diagnosis tests through the Self Test (for HW) menu. This Menu is only available for 2013 and later TVs.

- Go to Factory Menu > SVC > Self Test (for HW)

Select the hardware item you believe is defective. The TV displays the test results.

MAIN : Option, MODE : HDMI1, RES : NOSIGNAL

Loop Back	EcoSensor	
CPU	Voltage	0
DDR	Chip Test	0
FLASH	Module Test	
EEPROM	ATV CH Inspection	
Tuner X-TAL	DTV CH Inspection	
Tuner1	Satellite CH Inspection	
HDMI Switch IC	EXT Sound Inspection	
USB HUB IC	Woofer Sound Inspection	NONE
WIFI	DP Test	
LVDS	OK	DP CRC Result OK/Default
T-CON/FRC	OK	Voltage Result OK/Default
PCB Test		
MOIP		
BT		

### Example 1. Eco Sensor Test

Eco Sensor

Eco Sensor : OK

Back Light Step : 0

### Example 2. Voltage Test

Voltage

A5V : (0) OK

B5V : (0) OK

B12V : (0) OK

Audio Amp(B13V-B18V) : (0) OK

INVERTER ON/OFF : (0) OK

A3.3V : (0) OK

PANEL B+(13V) : (0) OK

LNB(13V-18V) : NOT SUPPORT

LNB\_13V18V\_SUB : NOT SUPPORT

DECODER 1.1V : (0) OK

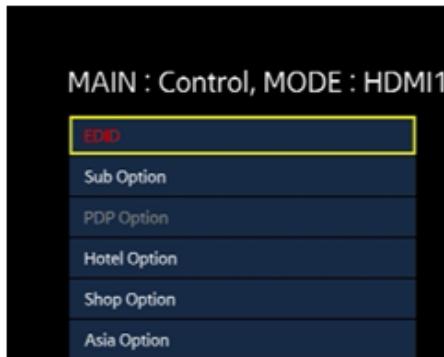

USB/WIFI/CI 5V : (0) OK

CPU 1.1V : (0) OK

## 6) How to rewrite HDMI EDID Data

If the TV fails to identify an HDMI device correctly or does not have Audio/Video from the HDMI device, follow these steps to rewrite HDMI EDID.

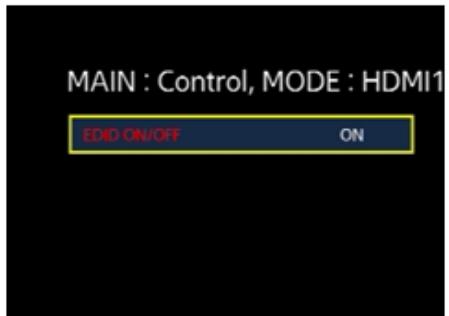

1. Remove ALL HDMI connections.
2. Factory Mode → Control → EDID.

3. Select EDID On/Off.

4. Press Right Arrow Key to change EDID OFF to ON.

5. Press Return (Menu). Select EDID Write All, and then press Enter.

6. Press the Right Arrow Key to Rewrite. Screen changes from Wait to Success.

7. Press the Menu button, and then verify that EDID WRITE HDMI shows "Success".
