# 1. Precautions

## 1-1. Safety Precautions

Follow these safety, servicing and ESD precautions to prevent damage and to protect against potential hazards such as electrical shock.

### 1-1-1. Warnings

For continued safety, do not attempt to modify the circuit board.  
Disconnect the AC power and DC power jack before servicing.

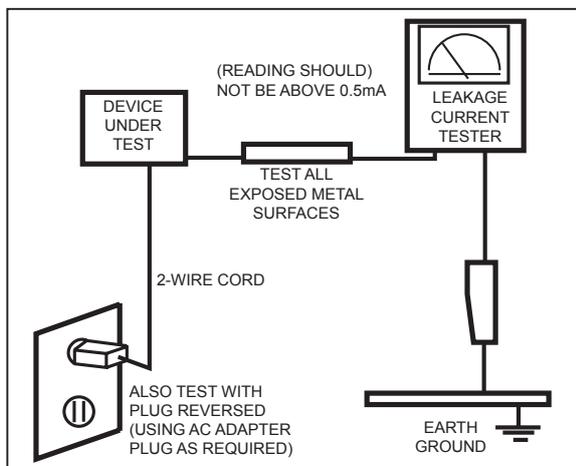

### 1-1-2. Servicing the LED TV

1. When servicing the LED TV, Disconnect the AC line cord from the AC outlet.
2. It is essential that service technicians have an accurate voltage meter available at all times. Check the calibration of this meter periodically.

### 1-1-3. Fire and Shock Hazard

Before returning the monitor to the user, perform the following safety checks:

1. Inspect each lead dress to make certain that the leads are not pinched or that hardware is not lodged between the chassis and other metal parts in the monitor.
2. Inspect all protective devices such as nonmetallic control knobs, insulating materials, cabinet backs, adjustment and compartment covers or shields, isolation resistor/capacitor networks, mechanical insulators, etc.
3. Leakage Current Hot Check:

Do not use an isolation transformer during this test.

Use a leakage current tester or a metering system that complies with American National Standards Institute (ANSI C101.1, Leakage Current for Appliances), and Underwriters Laboratories (UL Publication UL1410, 59.7).

4. With the unit completely reassembled, plug the AC line cord directly into a 120V AC outlet. With the unit's AC switch first in the ON position and then OFF, measure the current between a known earth ground (metal water pipe, conduit, etc.) and all exposed metal parts, including: metal cabinets, screwheads and control shafts. The current measured should not exceed 0.5 milliamp. Reverse the power-plug prongs in the AC outlet and repeat the test.

### **1-1-4. Product Safety Notices**

Some electrical and mechanical parts have special safety-related characteristics which are often not evident from visual inspection. The protection they give may not be obtained by replacing them with components rated for higher voltage, wattage, etc. Parts that have special safety characteristics are identified by  on schematics and parts lists. A substitute replacement that does not have the same safety characteristics as the recommended replacement part might create shock, fire and/or other hazards. Product safety is under review continuously and new instructions are issued whenever appropriate.

---

## 1-2. Servicing Precautions

An electrolytic capacitor installed with the wrong polarity might explode.

Before servicing units covered by this service manual, read and follow the Safety Precautions section of this manual.

If unforeseen circumstances create conflict between the following servicing precautions and any of the safety precautions, always follow the safety precautions.

### 1-2-1. General Servicing Precautions

1. Always unplug the unit's AC power cord from the AC power source and disconnect the DC Power Jack before attempting to: (a) remove or reinstall any component or assembly, (b) disconnect PCB plugs or connectors, (c) connect a test component in parallel with an electrolytic capacitor.
2. Some components are raised above the printed circuit board for safety. An insulation tube or tape is sometimes used. The internal wiring is sometimes clamped to prevent contact with thermally hot components. Reinstall all such elements to their original position.
3. After servicing, always check that the screws, components and wiring have been correctly reinstalled. Make sure that the area around the serviced part has not been damaged.
4. Check the insulation between the blades of the AC plug and accessible conductive parts (examples: metal panels, input terminals and earphone jacks).
5. Insulation Checking Procedure: Disconnect the power cord from the AC source and turn the power switch ON. Connect an insulation resistance meter (500 V) to the blades of the AC plug. The insulation resistance between each blade of the AC plug and accessible conductive parts (see above) should be greater than 1 megohm.
6. Always connect a test instrument's ground lead to the instrument chassis ground before connecting the positive lead; always remove the instrument's ground lead last.

### 1-3. Static Electricity Precautions

Some semiconductor (solid state) devices can be easily damaged by static electricity. Such components are commonly called Electrostatically Sensitive Devices (ESD). Examples of typical ESD are integrated circuits and some field-effect transistors. The following techniques will reduce the incidence of component damage caused by static electricity.

1. Immediately before handling any semiconductor components or assemblies, drain the electrostatic charge from your body by touching a known earth ground. Alternatively, wear a discharging wrist-strap device. To avoid a shock hazard, be sure to remove the wrist strap before applying power to the monitor.
2. After removing an ESD-equipped assembly, place it on a conductive surface such as aluminum foil to prevent accumulation of an electrostatic charge.
3. Do not use freon-propelled chemicals. These can generate electrical charges sufficient to damage ESDs.
4. Use only a grounded-tip soldering iron to solder or desolder ESDs.
5. Use only an anti-static solder removal device. Some solder removal devices not classified as "anti-static" can generate electrical charges sufficient to damage ESDs.
6. Do not remove a replacement ESD from its protective package until you are ready to install it. Most replacement ESDs are packaged with leads that are electrically shorted together by conductive foam, aluminum foil or other conductive materials.
7. Immediately before removing the protective material from the leads of a replacement ESD, touch the protective material to the chassis or circuit assembly into which the device will be installed.

Be sure no power is applied to the chassis or circuit and observe all other safety precautions.

8. Minimize body motions when handling unpackaged replacement ESDs. Motions such as brushing clothes together, or lifting your foot from a carpeted floor can generate enough static electricity to damage an ESD.

---

## 1-4. Installation Precautions

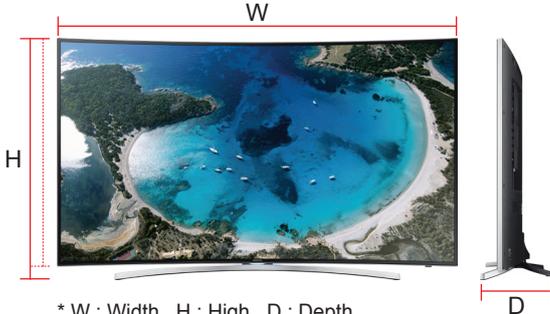

1. For safety reasons, more than a people are required for carrying the product.
2. Keep the power cord away from any heat emitting devices, as a melted covering may cause fire or electric shock.
3. Do not place the product in areas with poor ventilation such as a bookshelf or closet. The increased internal temperature may cause fire.
4. Bend the external antenna cable when connecting it to the product. This is a measure to protect it from being exposed to moisture. Otherwise, it may cause a fire or electric shock.
5. Make sure to turn the power off and unplug the power cord from the outlet before repositioning the product. Also check the antenna cable or the external connectors if they are fully unplugged. Damage to the cord may cause fire or electric shock.
6. Keep the antenna far away from any high-voltage cables and install it firmly. Contact with the highvoltage cable or the antenna falling over may cause fire or electric shock.
7. When installing the product, leave enough space (0.4m) between the product and the wall for ventilation purposes. A rise in temperature within the product may cause fire.
8. If an equipment is provided with a replaceable battery, and if replacement by an incorrect type could result in an explosion (for example, with some lithium batteries), the following applies:

**CAUTION**

- Risk of explosion if battery is replaced by an incorrect type dispose of used batteries according to the instructions.
- Do not dispose of batteries in a fire.
- Do not short circuit, disassemble or overheat the batteries.
- Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type.
- Do not be exposed to excessive heat such as sunshine, fire or the like.

## 2. Product Specifications

### 2-1. Product information

Model	UN**H8000AG

## 2-3. Accessories

**NOTE**

- The items' colors and shapes may vary depending on the model.
- Cables not included in the package contents can be purchased separately.
- The part code for some accessories may differ depending on your region.

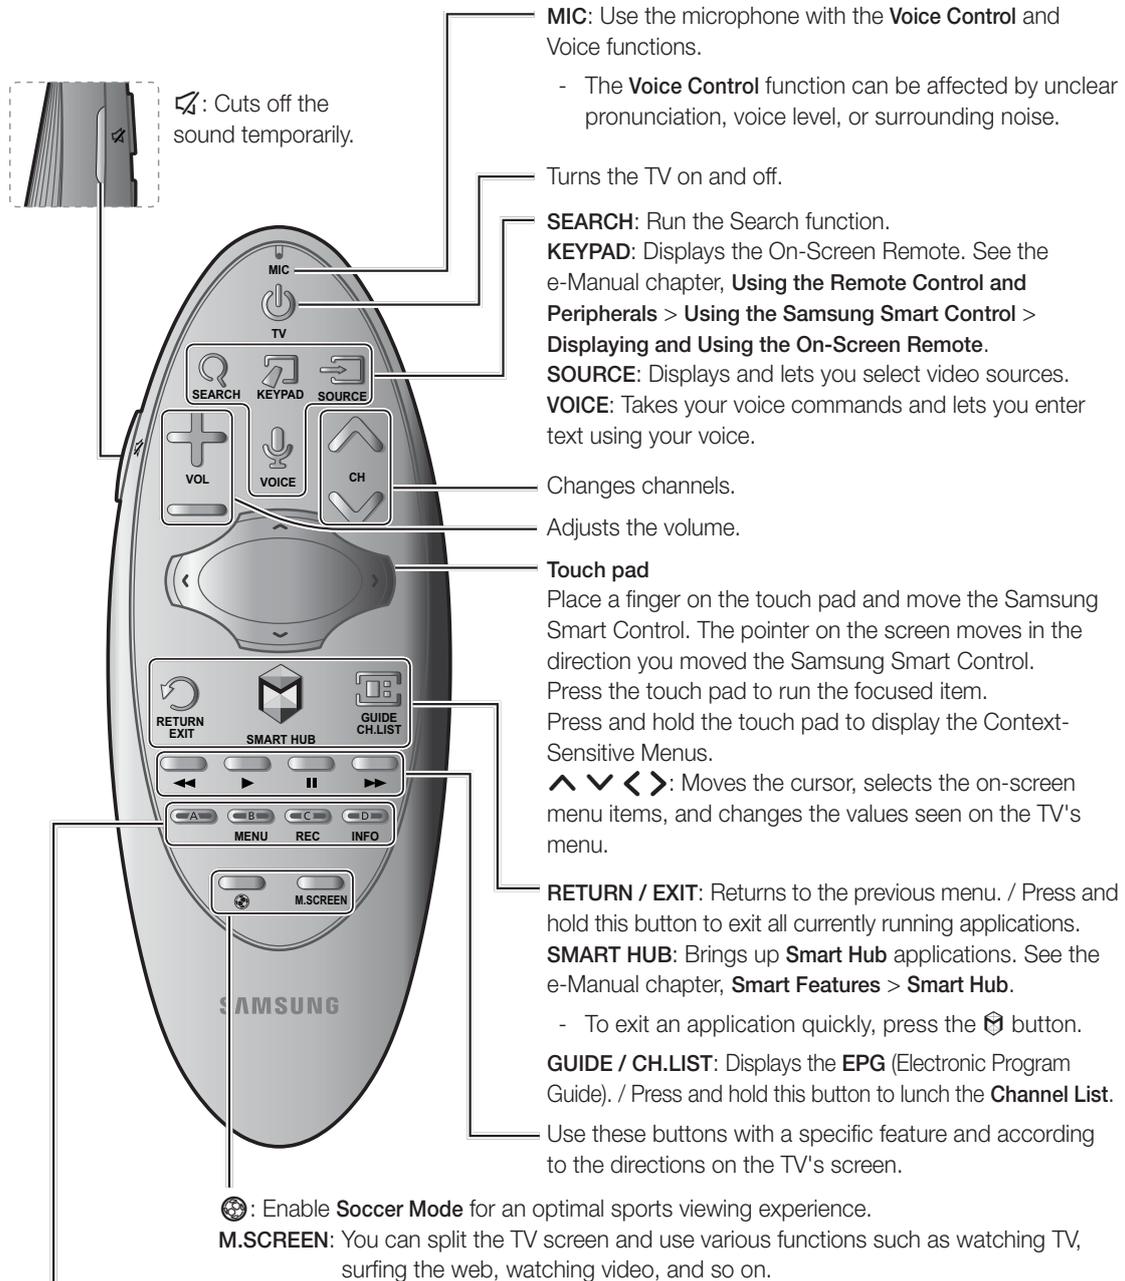

Product	Code. No	Product	Code. No
• Samsung Smart Control	BN59-01181H	• User Manual	BN68-05874B
• Batteries (AA x 2)	4301-000101	• Regulatory guide	BN68-04972A
• Power Cord	3903-000532	• Cleaning cloth	BN63-01798B
• Samsung 3D Active Glasses	BN96-27418A		

Image	Product	Code. No
	• IR Extender Cable	BN96-31644A
	• RCA Adapter	BN39-01154H
	• Wall mount adapter (Depending on the Model)	BN61-07295A
	• Cable Holder (Depending on the Model)	BN61-08370A

## 2-4. Viewing the Functions

### 2-4-1. Using the Samsung Smart Control

#### ■ Buttons and Functions

**Color button**: Use these color buttons to access additional options specific to the feature in use.

**MENU**: Press and hold the **■** button to display the menu on the screen.

**REC**: Press and hold the **■** button to record the broadcast.

**INFO**: Press and hold the **■** button to view information about the current digital channel or media file.

## ■ Using the Touch Pad and the Directional Buttons

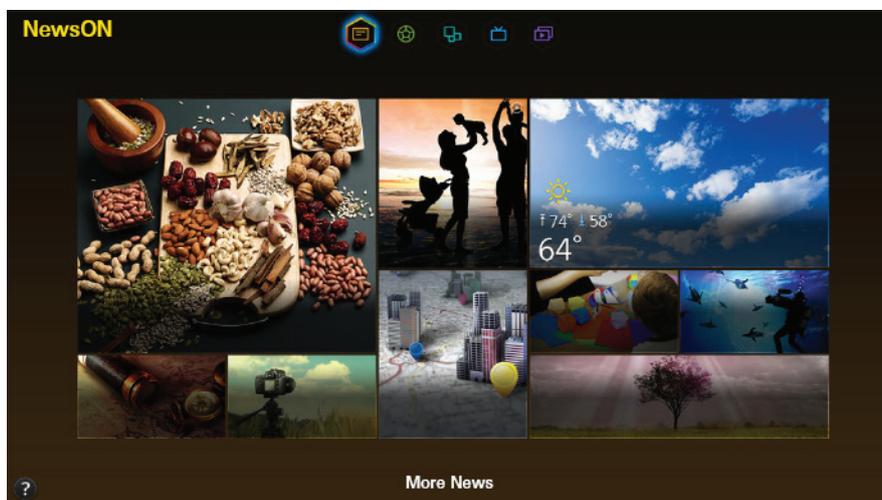

Image	Description
	<p><b>Moving the Focus/Pointer</b></p> <p>Press the directional buttons (up, down, left, and right) to move the pointer or focus in the direction.</p>
	<p><b>Menu Access &amp; Item Selection</b></p> <p>Press on the touchpad. This lets you access a TV menu or select an item.</p>
	<p><b>Displaying the Context-sensitive Menu on Smart Hub</b></p> <p>Press and hold on the touchpad from the Smart Hub screen. The Options menu available to the selected item appears.</p> <ul style="list-style-type: none"> <li>• The Options menu depends on the context.</li> </ul>
	<p><b>Moving to the Smart Hub panel</b></p> <p>On the Smart Hub screen, drag left or right on the touchpad. This will move the Smart hub panels left or right.</p>
	<p><b>Scrolling on the Web Browser</b></p> <p>Drag up/down on the touchpad in the web browser screen. This scrolls through the web screen.</p>

## 2-4-2. Viewing the Panel

### ■ NewsON Panel

The screen shown may vary depending on the model.

This service may be not available depending on the country or region.

**NewsON** provides a real-world service that informs users of news and weather-related information in one place without the need for a newspaper, smartphone, or computer.

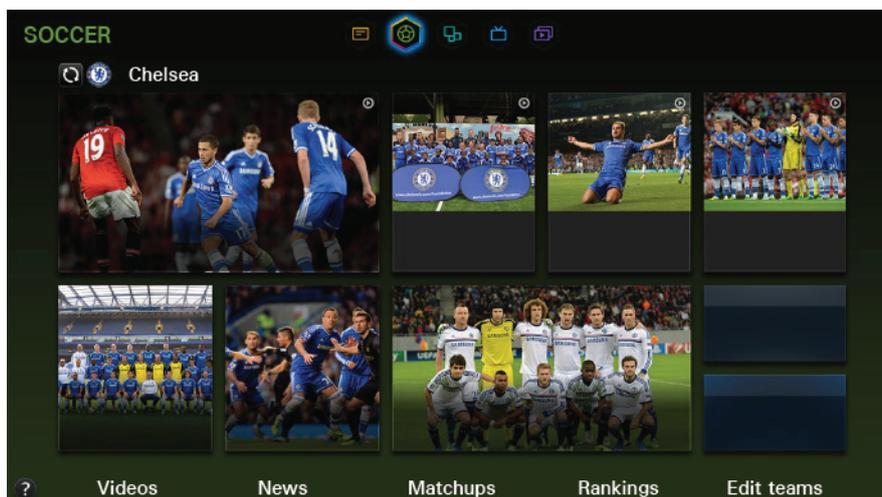

**NewsON** users can find daily information on a wide variety of topics in a smart and convenient way.

Updated in real time, **NewsON** informs users of the latest headlines, top stories, popular issues, and weather forecasts.

### ■ SOCCER Panel

The screen shown may vary depending on the model.

This service may be not available depending on the country or region.

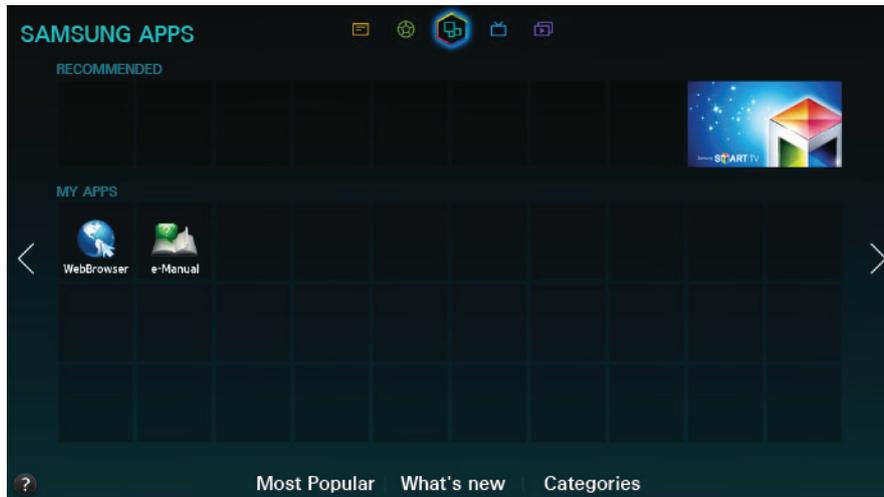

The **SOCCER** panel offers a variety of information about world soccer matches, featuring videos, news, matchups, and ratings. Adding a favorite team to the Favorite list allows easy access to information about team.

- Before you use the **SOCCER** panel, check if the TV is connected to the Internet. An Internet connection is required to access the **SOCCER** panel.
- To view the Quick Guide, select the  button.

## ■ SAMSUNG APPS Panel

The screen shown may vary depending on the model.

Smart Hub offers a variety of free news, sports, weather, and gaming content you can directly install and enjoy on your TV as you do on your smartphone or tablet.

- Before you use **SAMSUNG APPS**, check if the TV is connected to the Internet. Your TV must be connected to the Internet in order to use **SAMSUNG APPS**.
- When the Smart Hub is launched for the first time, the default apps are automatically installed. The default apps may differ depending on the region.

## ■ On TV Panel

The screen shown may vary depending on the model.

Availability depends on the specific area.

Availability of recommended content depends on the specific model and area.

If you move to the **On TV** panel in the Smart Hub, you can view the program list of the channels recommended by Smart Hub while you are watching a program.

- Before you use **On TV**, check if the TV is connected to the Internet. The TV must be connected to the Internet in order to use **On TV**.
- The channels or programs recommended by **On TV** may differ from the actual ones depending on the broadcast information provider.

## ■ Multimedia Panel (Playing Photos, Videos, and Music)

The screen shown may vary depending on the model.

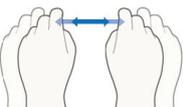

You can play media content saved on a USB device, smartphone, camera, computer, or cloud service on the TV.

- However, you cannot play media content if the content or the storage device is not supported by the TV. For more information, refer to "**Read Before Playing Photo, Video, or Music Files**".
- Backup important files before connecting a USB device. Samsung is not responsible for damaged or lost files.

### 2-4-3. Motion Control

The following basic motion control commands are available:

Image	Description
	<p><b>Moving the pointer</b> Moving your hand moves the pointer accordingly.</p>
	<p><b>Selecting an item</b> Fold down and raise your index finger to select items. This is the equivalent of clicking a mouse button. You can select a TV menu or run a function. Keeping your index finger lowered is like holding down a remote control button.</p>
	<p><b>Returning to the previous menu</b> Make a circle with your hand in the counterclockwise direction to return to the previous menu.</p>
	<p><b>Moving from one Smart Hub panel to another</b> Move your hand from left to right or from right to left as you would turn a book page. You can move directly from one Smart Hub panel to another.</p> <ul style="list-style-type: none"> <li>• Example: SAMSUNG APPS panel → On TV panel</li> </ul>
	<p><b>Displaying the Context-sensitive Menu on Smart Hub</b> Fold your index finger down for 1 second and then raise it. This displays the context-sensitive menu that is available for the selected item.</p>
	<p><b>Zooming the picture on the screen in or out</b> Facing the camera, raise both hands, and then raise the index finger on both hands. Two pointers appear on the screen when the TV recognizes the hands. Fold the index fingers of both hands down, and then horizontally widen or close your hands. This lets you zoom the picture on the screen in or out when the TV is displaying a web page, map, or photo.</p>
	<p><b>Panning a Zoomed-in Picture</b> To pan a zoomed-in picture, fold the index finger on one hand down, move the hand in the desired direction, and then raise the index finger.</p>
	<p><b>Rotating a Picture</b> Facing the camera, raise both hands, and then raise the index finger on both hands. Two pointers appear on the screen when the TV recognizes the hands. Fold the index fingers of both hands down, and then make a circle with your hands in clockwise or counterclockwise direction. You can rotate the picture when a video or photo is displayed on the screen.</p>
	<p><b>Using Like function</b> On Facebook, without activating Motion Control, face the camera, and then raise and hold a thumb up for 2 seconds. This automatically adds the Facebook 'Like' icon. Available only in Facebook.</p>

### 3. Disassembly and Reassembly

This section of the service manual describes the disassembly and reassembly procedures for the LED TV.

This LED TV contains electrostatically sensitive devices. Use caution when handling these components.

#### 3-1. Disassembly and Reassembly

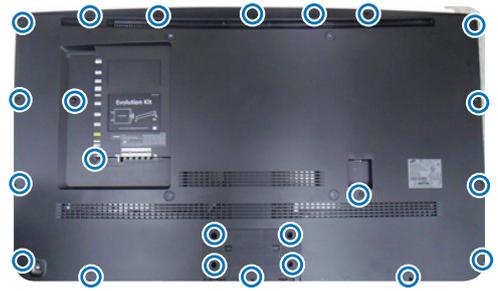

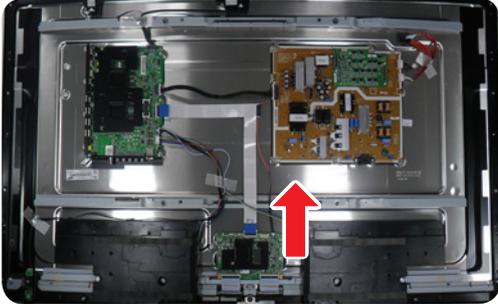

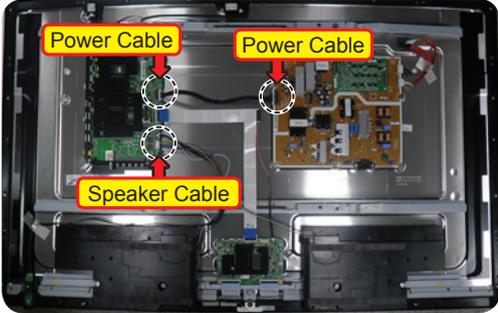

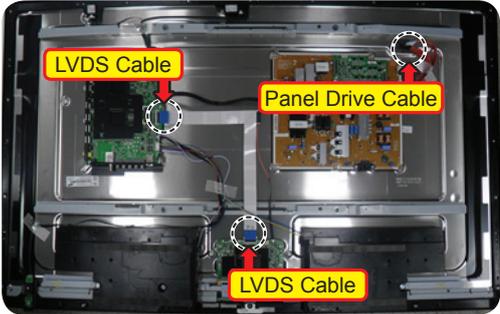

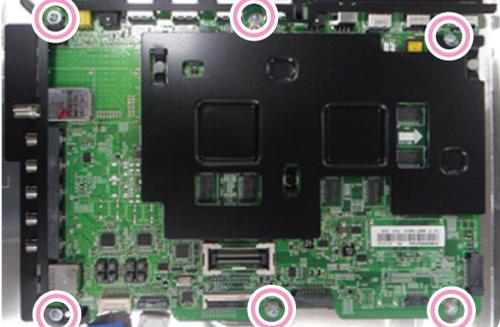

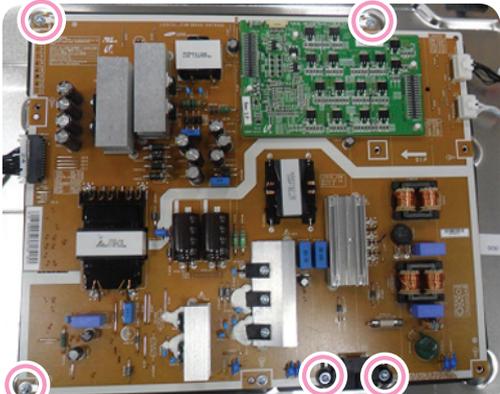

1. Disconnect the LED TV from the power source before disassembly.
2. Follow these directions carefully; never use metal instruments to pry apart the cabinet.
3. If there is no additional coment, it is same for all inches.

##### 3-1-1. TV Disassembly

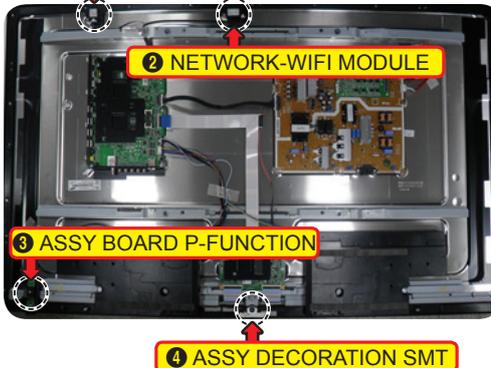

Description	Picture Description	Screws
<p><b>1</b> Carefully position the TV so that the screen is facing downwards.</p> <div style="border: 1px solid gray; padding: 5px; margin-top: 10px;"> <b>CAUTION</b>                      Make sure to place the TV upon a soft curved cushion or any material that will prevent damage to the screen.                 </div>		
<p><b>2</b> Remove 4 screws from the ASSY GUIDE P-STAND.</p>		<div style="text-align: center;"> <p style="font-size: small; color: orange; background-color: yellow; padding: 2px;">TORQUE 7~ 8Kgf.cm.</p> <p><b>6003-001782</b> (COMMON)</p> </div>

**NOTE**

Reassembly procedures are in the reverse order of disassembly procedures.

## 4. Troubleshooting

### 4-1. Previous Check

#### ■ Check list for initial operation

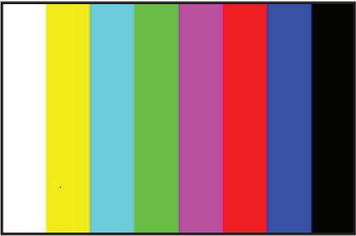

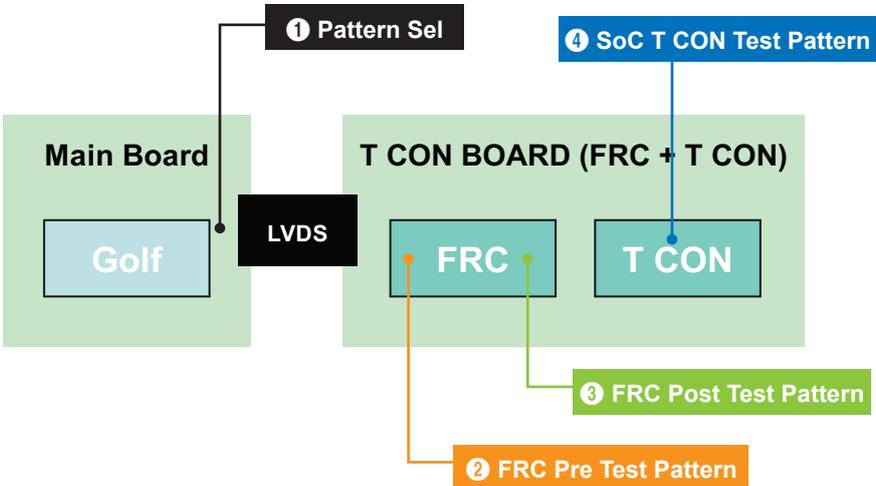

- AC Power Cord connected to the TV and the wall receptacle.
- Standby Power/IR Indicator LED is turned On.
- If Power/IR Indicator is not on check 10p power cable is connected and for correct Standby Voltage from SMPS to Main. Also check Jog Function Cable.
- Power turned On with Jog Function or Remote.
- Power on command from main Board to SMPS.
- Power/IR Indicator Flashes.
- Panel Back Lights are turned On.
- If no Backlights, unplug AC Power Cord, unplug 10 pin connector to SMPS, plug in AC Power Cord, Back light should come on. Check Main Board operation for error.
- Power/IR Indicator goes off.
- Picture or banner is displayed.
  - If nothing is displayed, check the LVDS cable.

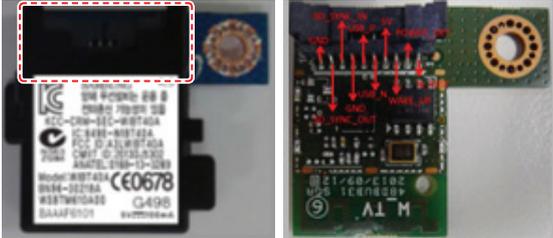

## 4-2. How to Check Fault Symptom

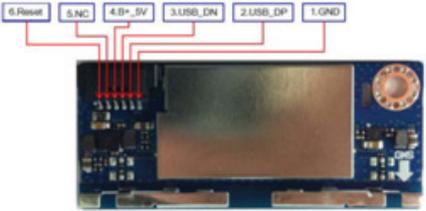

### 4-2-1. Video

Main Board	Pre-T-Con.	Post T-Con.	Problem
Pass	Pass	Pass	Check Signal Source and other inputs.
Fail	Pass	Pass	Main Board or LVDS Cable.
Fail	Fail	Pass	T CON Board.
Fail	Fail	Fail	T CON Board or Panel.

Symptom	Major checkpoints
	<ul style="list-style-type: none"> <li><b>ENTER</b> : Factory mode - SVC Info - Test Pattern</li> </ul>

## 4-2-3. Problems and Solutions

### ■ Apps

- Due to the product characteristics featured on the Samsung Smart Hub, as well as limitations in available content, certain features, applications, and services may not be available on all devices or in all territories. Some Smart Hub features may also require additional peripheral devices or membership fees. Visit <http://www.samsung.com> for more information on specific device information and content availability. Services and content availability are subject to change without prior notice.
- Samsung Electronics takes no legal responsibility whatsoever for any interruption of app services caused by the service provider for any reason.
- Application services may be provided in English only and available content may vary depending on the area.
- For more information about applications, visit the applicable service provider's website.
- An unstable Internet connection may cause delays or interruptions. In addition, applications may terminate automatically depending on the network environment. If this occurs, check your Internet connection and try again.
- Application services and updates may become unavailable.
- Application content is subject to change by the service provider without prior notice.
- Specific services may vary depending on the version of the application installed on the TV.
- An application's functionality may change in future versions of the application. If this occurs, run the application's tutorial or visit the service provider's website.
- Depending on the service provider's policies, certain applications may not support multitasking.

### ■ WebBrowser

- Select **Web Browser**. The browsing screen may differ from the one on your computer.
- The web browser is not compatible with Java applications.
- You cannot download files. If you attempt to download a file, you will receive an error message instead.
- The web browser may not be able to access certain websites.
- Playing Flash videos may be restricted.
- E-commerce for online purchases is not supported.
- With websites that have scrollable windows, scrolling through such a window can result in corrupted characters.
- ActiveX is not supported.
- Certain options are not accessible in Link Browsing mode. (Switch to Pointer Browsing to activate this.)
- Only a limited number of fonts are supported. Certain symbols and characters may not be displayed properly.
- The response to remote commands and the resulting on-screen display may be delayed while a webpage is loading.
- Loading a webpage may be delayed or suspended completely with certain operating systems.
- The copy and paste operations are not supported.
- When composing an email or a simple message, certain functions such as the font size and color selection may not be available.
- There is a limit to the number of bookmarks and the size of the log file that can be saved.
- The number of windows that can be opened concurrently varies depending on the search conditions and the TV model.
- The web browsing speed will vary depending on the network environment.
- Playing embedded video automatically disables PIP. Video playback may not commence after PIP is disabled. In this case, you will have to reload the page.
- The web browser supports .mp3 audio files only.
- The web browser supports a specific file format for importing and exporting bookmarks. (Compatible Format: Netscape-bookmarkfile- 1)
- The folder tree information is not included when importing and exporting bookmarks.
- Exporting bookmarks to a USB device connected to the TV saves the bookmarks under a folder named "Samsung SmartTV Bookmark".
- If **Clock (System - Time - Clock)** has not been enabled, the browsing history will not be saved.
- The browsing history is saved in the order of latest to oldest, with the oldest entries being overwritten first.

#### 4. Troubleshooting

---

- Depending on the types of video/audio codecs supported, it might not be possible to play back certain video and audio files during Flash playback.
- A sudden change in the picture brightness inside a video window may affect the brightness of the screen. This problem applies to PDP TVs only.
- Video sources from PC-optimized streaming service providers may not play properly on our proprietary web browser.
- Using the on-screen QWERTY keyboard automatically disables PIP. (Except when entering a URL.)

#### ■ Photo, Video, and Music File Use Limitations

- The TV supports MSC (Mass Storage Class) USB devices only. MSC is a class designation for mass storage devices. Types of MSC devices include external hard drives, flash card readers, and digital cameras. (USB hubs are not supported.) These kinds of devices must be connected directly to the TV's USB port. The TV may not be able to recognize the USB device or read the files on the device if it is connected to the TV via a USB extension cable. Do not disconnect the USB device while transferring files.
- When connecting an external hard drive, use the USB (HDD) port. We recommend that you use an external hard drive with its own power adapter.
- Certain digital cameras and audio devices may not be compatible with the TV.
- If there are multiple USB devices connected to the TV, the TV might not be able to recognize some or all the devices. USB devices that use high-power input should be connect the USB [5V, 1A] port.
- The TV supports the FAT, exFAT, and NTFS file systems.
- After sorting files in the Folder view mode, the TV can display up to 1000 files per folder. If the USB device contains more than 8,000 files and folders, however, some files and folders might not be accessible.
- The PTP (pier to pier) connection mode is available only for digital cameras. If you connect a smartphone or tablet to the TV using PTP mode, the TV will not recognize it.

## 4-3. Factory Mode Adjustments

### 4-3-1. Detail Factory Option

#### NOTE

If you replace the main board with new one, please change the factory option as well.  
The options you must change are "**Type**".

#### ■ Advanced

## 4-4. White Balance

### 4-4-1. Calibration

1. Into the Factory Mode.
2. Select **ADC/WB** menu.
3. Select **ADC** menu.

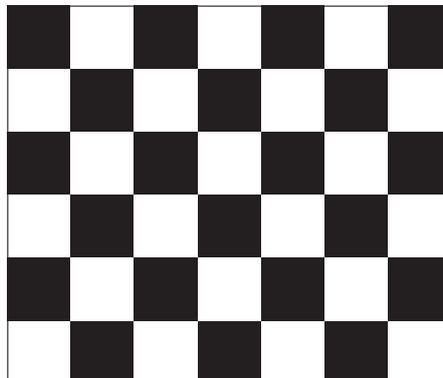

### 4-4-2. Service Adjustment

You must perform Calibration in the Lattice Pattern before adjusting the White Balance.

#### ■ Color Calibration

- Adjust Specification

Source	Setting Mode	Pattern	Use Equipment
HDMI	1280 x 720@60 Hz	Pattern #24 (Chess Pattern)	CA210 & Master MSPG925 Generator

(Chess Pattern)

- Use other equipment only after comparing the result with that of the Master equipment.

Input mode	Calibration	Pattern
CVBS IN (Model_#1)	Perform in NTSC B&W Pattern #24	Lattice
Component IN (Model_#6)	Perform in 720p B&W Pattern #24	Lattice
PC Analog IN (Model_#21)	Perform in VESA XGA (1024x768) B&W Pattern #24	Lattice
HDMI IN	Perform in 720p B&W Pattern #24	Lattice

### ■ Method of Color Calibration (AV)

1. Apply the NTSC Lattice (N0. 3) pattern signal to the AV IN 1 port.
2. Press the Source key to switch to "AV1" mode.
3. Enter Service mode.
4. Select the "ADC" menu.
5. Select the "AV Calibration" menu.
6. In "AV Calibration Off" status, press the "▶" key to perform Calibration.
7. When Calibration is complete, it returns to the high-level menu.
8. You can see the change of the "AV Calibration" status from Failure to Success.

### ■ Method of Color Calibration (Component)

1. Apply the 720p Lattice (N0. 6) pattern signal to the Component IN 1 port.
2. Press the Source key to switch to "Component1" mode.
3. Enter Service mode.
4. Select the "ADC" menu.
5. Select the "Comp Calibration" menu.
6. In "Comp Calibration Off" status, press the "▶" key to perform Calibration.
7. When Calibration is complete, it returns to the high-level menu.
8. You can see the change of the "Comp Calibration" status from Failure to Success.

### ■ Method of Color Calibration (PC)

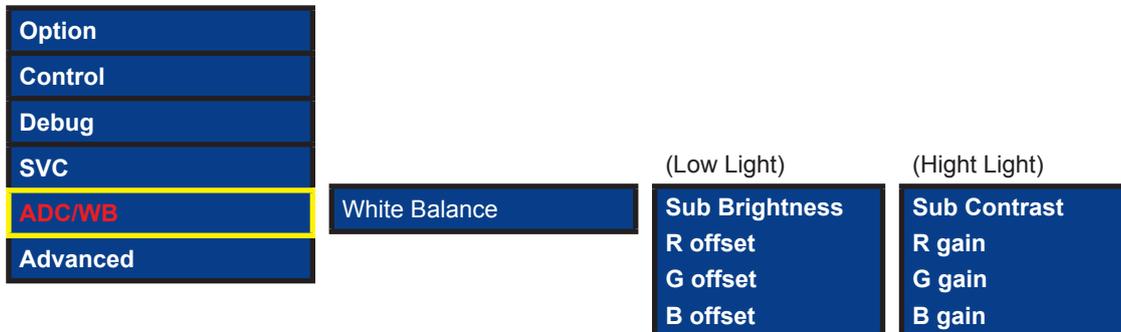

1. Apply the VESA XGA Lattice (N0. 21) pattern signal to the PC IN port.
2. Press the Source key to switch to "PC" mode.
3. Enter Service mode.
4. Select the "ADC" menu.
5. Select the "PC Calibration" menu.
6. In "PC Calibration Off" status, press the "▶" key to perform Calibration.
7. When Calibration is complete, it returns to the high-level menu.
8. You can see the change of the "PC Calibration" status from Failure to Success.

### ■ Method of Color Calibration (HDMI)

1. Apply the 720p Lattice (N0. 6) pattern signal to the HDMI1/DVI IN port.
2. Press the Source key to switch to "HDMI1" mode.
3. Enter Service mode.
4. Select the "ADC" menu.
5. Select the "HDMI Calibration" menu.
6. In "HDMI Calibration Off" status, press the "▶" key to perform Calibration.
7. When Calibration is complete, it returns to the high-level menu.
8. You can see the change of the "HDMI Calibration" status from Failure to Success.

### 4-4-3. Adjustment

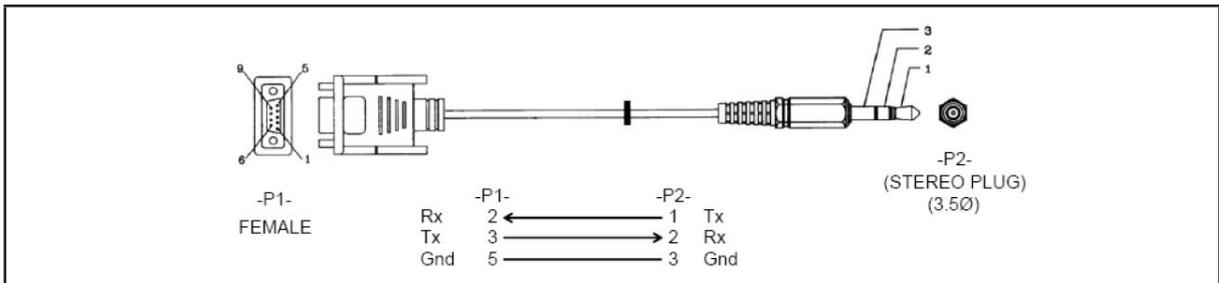

1. Into the Factory Mode.
2. Select **ADC/WB** menu.
3. Select **White Balance** menu.

## 4-5. RS-232C

- **RS232C Control**

- Port : COM#(Serial)
- Bit rate : 115200
- Data Bit : 8 bit
- Parity : None
- Stop Bits : 1
- Flow Control : None

## 4-7. Updating the TV's Software

- [MENU](#) > [Support](#) > [Software Update](#)

View your TV's software version and update it if necessary.

The TV is set to update software automatically via the internet by default. If you don't want to update it automatically, set [Auto Update](#) ([Support](#) > [Software Update](#) > [Auto Update](#)) to **Off**.

**CAUTION**

DO NOT turn off the TV's power until the update is complete. The TV will turn off and on automatically after completing the software update. All video and audio settings return to the default settings after a software update.

### ■ Update now

- [MENU](#) > [Support](#) > [Software Update](#) > [Update now](#)

Update now lets you update your TV's software in three ways:

- Online, by downloading the update from the Internet directly to your TV.
- Manually, using a USB flash drive.
- Automatically (Auto Update), while the TV is in Standby Mode.

**CAUTION**

Do not turn off the TV during the Software Update. It may cause the TV to malfunction.

### Online

To update your TV using the Online method, follow these steps:

1

Make sure that your TV is connected to your local network and the Internet.

- The connection can be wired or wireless.

2

All video and audio settings return to their default settings after a software update.

- We recommend you record your current settings now so you can easily re-establish your settings when the update is complete.

3

Press the **MENU** button, and then select [Support](#) > [Software Update](#) > [Update now](#).

- The Update now pop-up appears.

4

The TV searches on line for the latest software version for your TV.

- If it does not find an update, the "**No new updates**" pop-up appears. Press the **EXIT** button to exit.
- If the TV finds a new version, the Update Request pop-up appears.

5

Select **OK**. The TV updates the software, turns off, and then turns on automatically.

### Manually, Using a USB Flash Drive

To update your TV using the Manual method, follow these steps:

1

All video and audio settings return to their default settings after a software update.

- We recommend you record your current settings now so you can easily re-establish your settings when the update is complete.

2

On a computer, visit [www.samsung.com](http://www.samsung.com).

- Select [GET SUPPORT](#) > [Get Downloads](#).

3

Enter the product's model number into the search field.

- As you enter the model number, a drop down will display products that match the model number.

4

Click your product's model number in the drop down list.

- On the page that appears, scroll down to and then click [Downloads](#).

5

Click [Firmware](#) in the center of the page.

6

Click the [ZIP](#) button in the File column.

- Click [Send](#) in the first pop-up that appears.

7

Click [Save](#) in the second pop-up to download, and then save the firmware file to your computer.

- Unzip the zip archive to your computer. You should have a single folder with the same name as the zip file.

8

Copy the folder to a USB flash drive.

- Insert the USB flash drive into a USB port of the TV.

9

In the TV's menu, go to [Support](#) > [Software Update](#) > [Update now](#).

- The TV searches for the software on the USB drive. When it finds the software, the Update Request pop-up appears.

10

Select [OK](#). The TV updates the software, turns off, and then turns back on automatically.

---

## Enabling Automatic Software Updates

- **MENU > Support > Software Update > Auto Update**

If the TV is connected to the Internet, it can be updated via Auto Update while watching the TV. When the Background upgrade completed, the update will be applied the next time the TV is used.

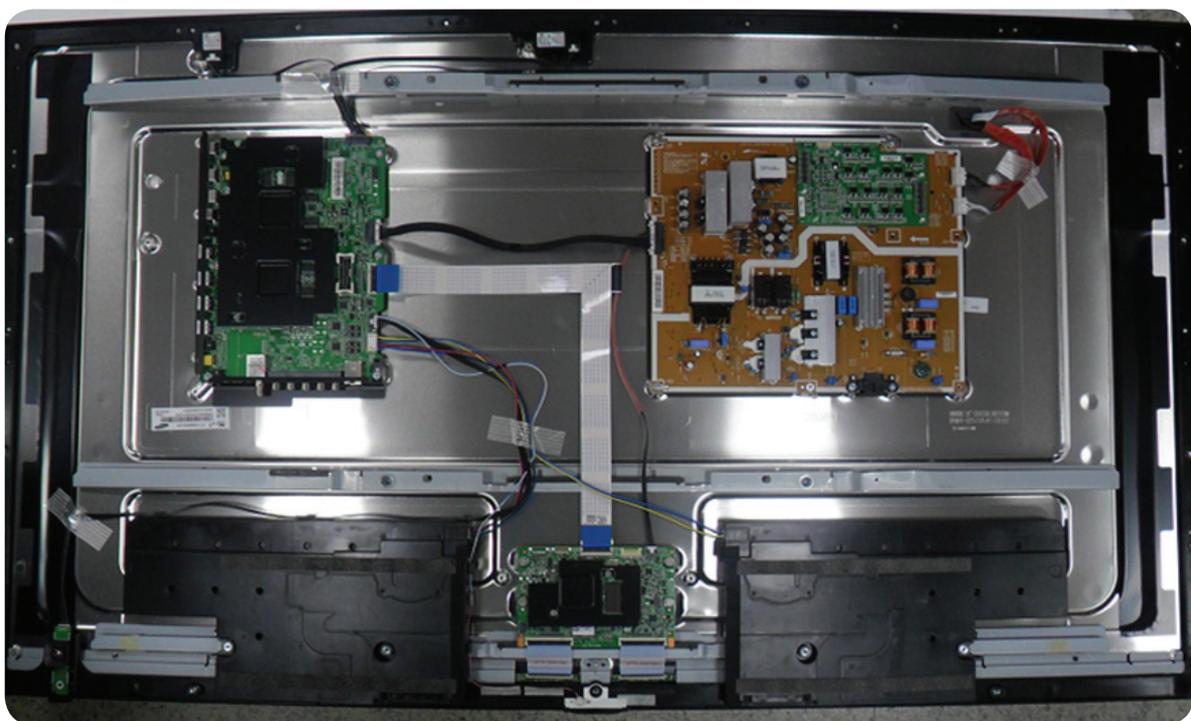

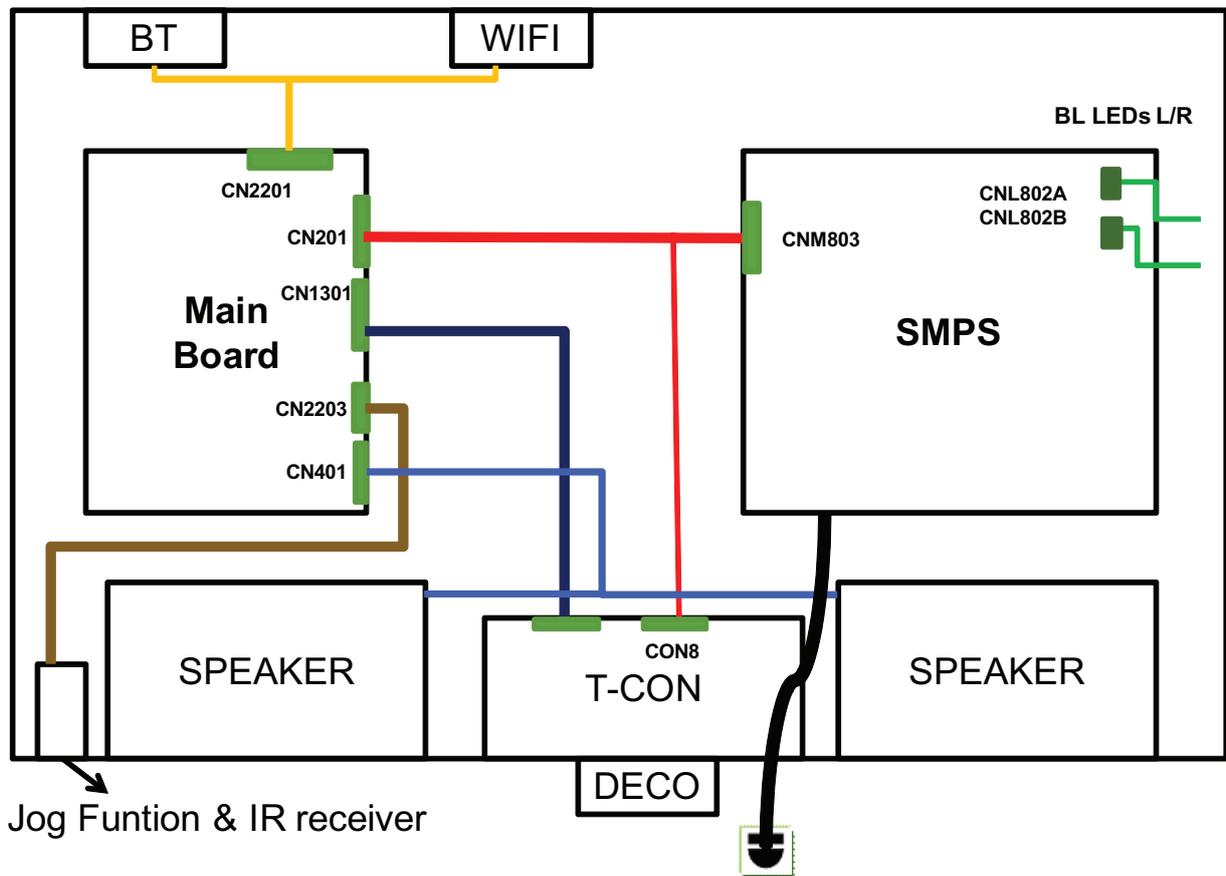

This option requires an Internet connection.

If you agree to the Smart Hub terms and conditions, Auto Update will be set to On automatically. If you don't want the TV's software updated automatically, set **Auto Update** (**Support > Software Update > Auto Update**) to Off.
